### Job Narrative 190-19915-1

## Comments

No additional comments.

## Receipt

The samples were received on 6/5/2019 12:15 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 3.9° C.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

The recovery of the extraction standard d5-NEtFOSAA was outside QC acceptance criteria in the opening CCV associated with this sample. Since the recovery of the d5-NEtFOSAA was within acceptance criteria in the sample, the data is reported.

The recovery of the extraction standard d5-NEtFOSAA was outside QC acceptance criteria in the opening CCV associated with this sample. Since the recovery of the d5-NEtFOSAA was within acceptance criteria in the sample, the data is reported.

## Quality Control Summary

Client Name: TestAmerica Brighton MI  
Reported: 06/21/2019 13:39

Group Number: 2047572

Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

All Inorganic Initial Calibration and Continuing Calibration Blanks met acceptable method criteria unless otherwise noted on the Analysis Report.

\*- Outside of specification

\*\* - This limit was used in the evaluation of the final result for the blank

(1) The result for one or both determinations was less than five times the LOQ.

(2) The unspiked result was more than four times the spike added.

\*- Outside of specification

\*\*--This limit was used in the evaluation of the final result for the blank

(1) The result for one or both determinations was less than five times the LOQ.

(2) The unspiked result was more than four times the spike added.

| <b>&lt;</b>             | less than                                                                                                                                                                                                                                                                                                                                                  |                 |                               |
| <b>&gt;</b>             | greater than                                                                                                                                                                                                                                                                                                                                               |                 |                               |
| <b>ppm</b>              | parts per million - One ppm is equivalent to one milligram per kilogram (mg/kg) or one gram per million grams. For aqueous liquids, ppm is usually taken to be equivalent to milligrams per liter (mg/l), because one liter of water has a weight very close to a kilogram. For gases or vapors, one ppm is equivalent to one microliter per liter of gas. |                 |                               |
| <b>ppb</b>              | parts per billion                                                                                                                                                                                                                                                                                                                                          |                 |                               |
| <b>Dry weight basis</b> | Results printed under this heading have been adjusted for moisture content. This increases the analyte weight concentration to approximate the value present in a similar sample without moisture. All other results are reported on an as-received basis.                                                                                                 |                 |                               |

**Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.**

Measurement uncertainty values, as applicable, are available upon request.

Tests results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff.

This report shall not be reproduced except in full, without the written approval of the laboratory.

Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as "analyze immediately" are not performed within 15 minutes.

**WARRANTY AND LIMITS OF LIABILITY** - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. THE FOREGOING EXPRESS WARRANTY IS EXCLUSIVE AND IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. WE DISCLAIM ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING A WARRANTY OF FITNESS FOR PARTICULAR PURPOSE AND WARRANTY OF MERCHANTABILITY. IN NO EVENT SHALL EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL, LLC BE LIABLE FOR INDIRECT, SPECIAL, CONSEQUENTIAL, OR INCIDENTAL DAMAGES INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF PROFIT OR GOODWILL REGARDLESS OF (A) THE NEGLIGENCE (EITHER SOLE OR CONCURRENT) OF EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL AND (B) WHETHER EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. We accept no legal responsibility for the purposes for which the client uses the test results. No purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

# Data Qualifiers

| Qualifier      | Definition                                                                                                                                                    |
|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| C              | Result confirmed by reanalysis                                                                                                                                |
| D1             | Indicates for dual column analyses that the result is reported from column 1                                                                                  |
| D2             | Indicates for dual column analyses that the result is reported from column 2                                                                                  |
| E              | Concentration exceeds the calibration range                                                                                                                   |
| K1             | Initial Calibration Blank is above the QC limit and the sample result is ND                                                                                   |
| K2             | Continuing Calibration Blank is above the QC limit and the sample result is ND                                                                                |
| K3             | Initial Calibration Verification is above the QC limit and the sample result is ND                                                                            |
| K4             | Continuing Calibration Verification is above the QC limit and the sample result is ND                                                                         |
| J (or G, I, X) | Estimated value $\geq$ the Method Detection Limit (MDL or DL) and $<$ the Limit of Quantitation (LOQ or RL)                                                   |
| P              | Concentration difference between the primary and confirmation column $>40\%$ . The lower result is reported.                                                  |
| P^             | Concentration difference between the primary and confirmation column $>40\%$ . The higher result is reported.                                                 |
| U              | Analyte was not detected at the value indicated                                                                                                               |
| V              | Concentration difference between the primary and confirmation column $>100\%$ . The reporting limit is raised due to this disparity and evident interference. |
| W              | The dissolved oxygen uptake for the unseeded blank is greater than 0.20 mg/L.                                                                                 |
| Z              | Laboratory Defined - see analysis report                                                                                                                      |

Additional Organic and Inorganic CLP qualifiers may be used with Form 1 reports as defined by the CLP methods. Qualifiers specific to Dioxin/Furans and PCB Congeners are detailed on the individual Analysis Report.

### Glossary

| Abbreviation   | These commonly used abbreviations may or may not be present in this report.                                 |
|----------------|-------------------------------------------------------------------------------------------------------------|
| □              | Listed under the "D" column to designate that the result is reported on a dry weight basis                  |
| %R             | Percent Recovery                                                                                            |
| CFL            | Contains Free Liquid                                                                                        |
| CNF            | Contains No Free Liquid                                                                                     |
| DER            | Duplicate Error Ratio (normalized absolute difference)                                                      |
| Dil Fac        | Dilution Factor                                                                                             |
| DL             | Detection Limit (DoD/DOE)                                                                                   |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC            | Decision Level Concentration (Radiochemistry)                                                               |
| EDL            | Estimated Detection Limit (Dioxin)                                                                          |
| LOD            | Limit of Detection (DoD/DOE)                                                                                |
| LOQ            | Limit of Quantitation (DoD/DOE)                                                                             |
| MDA            | Minimum Detectable Activity (Radiochemistry)                                                                |
| MDC            | Minimum Detectable Concentration (Radiochemistry)                                                           |
| MDL            | Method Detection Limit                                                                                      |
| ML             | Minimum Level (Dioxin)                                                                                      |
| NC             | Not Calculated                                                                                              |
| ND             | Not Detected at the reporting limit (or MDL or EDL if shown)                                                |
| PQL            | Practical Quantitation Limit                                                                                |
| QC             | Quality Control                                                                                             |
| RER            | Relative Error Ratio (Radiochemistry)                                                                       |
| RL             | Reporting Limit or Requested Limit (Radiochemistry)                                                         |
| RPD            | Relative Percent Difference, a measure of the relative difference between two points                        |
| TEF            | Toxicity Equivalent Factor (Dioxin)                                                                         |
| TEQ            | Toxicity Equivalent Quotient (Dioxin)                                                                       |

# Accreditation/Certification Summary

Client: City of Cadillac Utilities  
Project/Site: City of Cadillac WWTP PFAS

Job ID: 190-19915-1

## Laboratory: Eurofins TestAmerica, Michigan

All accreditations/certifications held by this laboratory are listed. Not all accreditations/certifications are applicable to this report.

| Authority | Program       | EPA Region | Identification Number | Expiration Date |
|-----------|---------------|------------|-----------------------|-----------------|
| Michigan  | State         |            | 0057                  | 05-05-20        |
| Michigan  | State Program | 5          | 57                    | 05-05-20        |

Ver: 01/16/2019

## Cooler/Sample Receipt

(AFTER HOURS receipt - complete gray areas)  
Place cooler in walk-in, place this form in Receiving in box. Date Time rec'd Initials

\* Receipt temperatures are considered acceptable if the samples are received on the same day they were collected & show signs that the cooling process has started. Temperature acceptance for most tests is ≤6.0°C, but not frozen. For additional information, please refer to SOP DT-SCA-004 Sample Receipt and Login, Attachment 2 - Holding Times, Preservation and Container Requirements

### Receipt Questions\*\*

|                                                                                                                                                                                                                   | Y                                   | N | n/a                                 | "No" answers require additional comment          |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|---|-------------------------------------|--------------------------------------------------|
| COC present & TA receipt signature, date, & time properly documented?                                                                                                                                             | <input checked="" type="checkbox"/> |   |                                     |                                                  |
| Containers & labels in good condition? (unbroken, not leaking, appropriately filled, labels legible & attached)                                                                                                   | <input checked="" type="checkbox"/> |   |                                     |                                                  |
| Appropriate containers used & adequate volume provided?                                                                                                                                                           | <input checked="" type="checkbox"/> |   |                                     |                                                  |
| Number of sample containers match COC?                                                                                                                                                                            | <input checked="" type="checkbox"/> |   |                                     | Preserved Bottles Checked with pH Strips* Yes No |
| Samples received within hold time?                                                                                                                                                                                | <input checked="" type="checkbox"/> |   |                                     |                                                  |
| Samples submitted for GRO and Volatiles analyses (8260, 624, 524) received without headspace?                                                                                                                     |                                     |   | <input checked="" type="checkbox"/> |                                                  |
| Was a Trip Blank received with VOA samples?                                                                                                                                                                       |                                     |   | <input checked="" type="checkbox"/> |                                                  |
| Were the samples free of any questionable physical conformities? For example, field duplicates or multiple bottles of the same sample do not significantly vary in appearance (color, proportion of solids, etc.) | <input checked="" type="checkbox"/> |   |                                     |                                                  |
| Were the COC, bottle labels, and all other items free of all other discrepancies or issues that would need to be addressed with the Project Manager and/or Client?                                                | <input checked="" type="checkbox"/> |   |                                     |                                                  |

\*\* May not be applicable if samples are not for compliance testing

\* Excludes FOG, Volatiles, TOC Vials

### Client Contact Record

Contact via: ☐ Phone ☐ Email ☐ Other Person Contacted: Date/Time:
