Mr. Dianne Pycroft
M.D.N.R. Rt. 1
Cadillac, Mich 49601

The August 7 public hearing provided a convenient platform for promotion of a Cadillac Cogeneration project. I don't object to their participation in the environmental cleanup, if they are properly supervised. Their efforts could reduce the cleanup costs and help to fulfill their obligation to clean up VOC pollution caused by Kysor. However, I question the ability of area forests to sustain a project of the size they propose.

Several years ago a Kysor retiree explained to me how some of the contamination happened. I believe that Kysor should be held responsible for the contamination they produced.

Yours Truly
