Subject: RE: LA docs and DTs submitted for Biosolids AR-Questions-needs applier signature...

Hi Doug – I'm back from vacation and am just now seeing your email message. The attached document you sent needs to be signed and dated by the Applier. You will need to have them do that and once you get the final document, then send it back to me via email.
Thanks

Cindy
PS: I'll check with Mike Person about how you determine the DTs and get back to you.

Cindy,
I've attached the revised pathogen doc. I am contacting them again to see if they have the DT applied doc. As far as my figures on DT's I use our daily lab numbers which is a composite of every truck load hauled out for the day and the number of gallons hauled each day to figure my DT's . I had talked to Dave S. in the past and he said that was acceptable because of the discrepancies we've had with previous haulers numbers.
Thanks Doug

Subject: Land appl docs and DTs submitted for Biosolids AR - Questions
Importance: High

Hi Doug – I'm trying to figure out the land application documents you submitted for the Annual Report.
One is in an Excel spreadsheet and the others are pdfs of Ag rate calculations. I cannot make heads or tails out of the Ag rate calculations. I'm trying to find on these sheets how many Dry Tons (DT) of Biosolids were land applied on these fields and I can't find that anywhere. The one site you uploaded as an *Excel spreadsheet*, is nice because I can find the DT information.

Do you have sheets for each one of the other sites with the same info as the one (2018 As applied-29NS01)? Or, at least something for the other sites that tells me how many DTs of biosolids were applied to the site?

The other information is fine to submit, it's just that not all the information is on these sheets.

Also, the Applier from Iowa for this past Spring, on their certification form for Pathogen and Site Restrictions, they marked – 7 day fecal and Geometric mean. Cadillac doesn't do that one, you guys do Anaerobic Digestion. See my attachment, the process they should've marked.

To finish up this report review, I will need the following:

- A revised Pathogen & Site Restriction form from the Applier for the Spring haul.
- Documentation showing how many DTs per site were applied.

Then I can correctly figure out the DTs per your facility for the year. **Right now, I calculated 274 DTs and you reported 240.87 DTs.** That's a big difference.

Let me know if you have questions. I'm only in until 3:30 pm tomorrow (Fri. Nov. 16) and will be on vacation after that until Dec. 5, returning on that day at 7 am.

Cindy
