Subject: RMP modifications - Scheduled Report now in Miwaters
Attachments: Find thru Apps-Requests-Reports.jpg, find thru Dashboard-As Needed tab.jpg

Hi Doug – I wanted to let you know there is a new scheduled report in Miwaters for Cadillac WWTP. As you & I were talking a week or so ago, you were wondering about having your RMP modified so the plant could land apply on hay fields at any time, not just when the plant was having storage issues. Well, now there is a place you can go to to upload that request. You can get to this 'as needed' report two different ways.

Through your 'Dashboard' or through Apps, Request, and Reports. See my attachments.

An RMP modification would be considered a report. The scheduled report you see is quite generic and is basically a report where you upload everything, no form to fill out.

If you have any questions, as you go through this let me know.

Cindy
