Jeff,

Thank you for getting me a list. I do not need the upgrades that are no longer in use to be included, no. I appreciate the quick response.

Tom,

I will get you an updated list of upgrades from 1990.

Do you want upgrades we no longer use? Example is disinfection . Ton Chlorine cylinders(pre 1990) to Hypochlorite (1997) to UV disinfection (2003 to current).

Subject: Cadillac WWTP

Good afternoon,

I am working on the reissuance of the Cadillac WWTP NPDES permit and need additional information relating to the facility's upgrade history and potential future upgrade plans. The plant brochure included with the application describes upgrade history up to the 1989-1990 expansion. I am seeking additional information concerning upgrade history beyond this date. Would you be able to provide me the following information regarding the treatment plant?

1. A brief history of any significant upgrades have occurred since the 1989-1990 expansion. This can just be a quick, bullet-point list.
2. A description of any plans for upgrading the plant in the future.

Thank you,

Tom Braum
