

Bulk Biosolids Generator's Certification Statement
Proof of Pathogen Reduction and Process

Certification

"I certify under, penalty of law, that the information that will be used to determine compliance with the class B pathogen requirements in R323.2414(3) has been prepared under my direction and supervision in accordance with the system designed to ensure that qualified personnel properly gather and evaluate the information. I am aware that there are significant penalties for false certification including possibility of fine and imprisonment."

UTILITIES DIRECTOR

The Class B Pathogen Requirement in R323.2414(3) were met through:

Alternative 1:

Rule 2414(3)(c) The following provisions apply to class B biosolids:

- (i) Seven representative samples of the biosolids that are used shall be collected.
- (ii) The geometric mean of the density of fecal coliform in the samples collected in subdivision (c)(i) of this sub rule shall be less than either 2,000,000 most probably number per gram of total solids (dry weight basis) or 2,000,000 colony-forming units per gram of total solids (dry weight basis).

Alternative 2: Rule 323.2418 (1) Choose 1 and check if applicable

- 1. The process to significantly reduce pathogens (PSRP)
 - a) Aerobic Digestion
 - b) Drying Beds
 - ☒ c) Anaerobic Digestion
 - d) Composting
 - e) Lime Stabilization

Alternative 3: Rule 323.2418 (2) Choose 1 and check if any apply

- 2. The process to further reduce pathogens (PFRP)
 - a) Within-vessel composting or statically aerated pile composting
 - b) Direct or indirect contact with hot gas
 - c) Liquid in elevated heat
 - d) Liquid additionally aerated agitation with time and temperature
 - e) Radiation with beta rays
 - f) Irradiation with gamma rays
 - g) Maintaining biosolids at 70 Celsius for 30 minutes
