

Pathogens and Vector Attraction Reduction

Certification Applier Proof of Pathogen Reduction

“I certify, under the penalty of law, that information that will be used to determine compliance with the pathogen requirements in R323.2414 (3) has been prepared under my direction and supervision in accordance with the system designed to ensure that qualified personnel properly gather and evaluate the information. I am aware that there are significant penalties for false certification including the possibility of fine and imprisonment.”

Pathogen requirements for R323.2414 (3) are met through:

- (i) Seven representative samples of the biosolids that are used shall be collected.
- (ii) The geometric mean of the density of fecal coliform in the samples collected in subdivision (c)(i) of this subrule shall be less than either 2,000,000 most probable number per gram of total solids (dry weight basis) or 2,000,000 colony-forming units per gram of total solids (dry weight basis).

Certification of Applier Vector Attraction

“I certify, under penalty of law, that the information that will be used to determine compliance with the management practices in R323.2410 and the vector attraction reduction requirement in R323.2415 (4)(i) has been prepared under my direction and supervision in accordance with the system designed to ensure that qualified personnel properly gather and evaluate the information. I am aware that there are significant penalties for false certification including the possibility of fine and imprisonment.”

Vector attraction reduction requirements for R323.2415 (4) (i) and or (j) are met through:

- (i) A person who applies biosolids shall inject below the surface of the land.
- (ii) A person who applies biosolids shall ensure that a significant amount of the biosolids is not present on the land surface within one hour after the biosolids are injected.

- (j) A person who applies biosolids to the land surface shall ensure that the biosolids are incorporated into the soil within 6 hours after application to or placement on the land, unless otherwise specified by the permitting authority.
