Subject: Cadillac WWTP - Biosolids numbers for FY18 plus info

Hi Doug – I got a chance to discuss how you guys determine the total Dry Tons for your facility. He told me that is perfectly alright and that is actually more accurate. Which I agree, but now I at least know for sure.

So, the numbers you put down for FY18 are fine.

I would still like it if you could send me the signed certification page from the applier **and** if you can find out from them how many Dry Tons were applied to each field and on what days?

Thanks.

Cindy
