

July 26 , 2000

Mr. Mike Person
Michigan Department of Environmental Quality
Cadillac District Office
120 West Chapin Street
Cadillac , Michigan 49601

Enclosed is the RMP report for biosolids that was due on July 7 , 2000. I hope everything is in order. If you need any additional information please contact me.

If you have any questions please feel free to call me.

Jeffrey M. Dietlin
Water Resources Supervisor
Phone # : (231) 775 - 2841

State of Michigan Biosolids Land Application Program

Facility Name
City of Cadillac Waste Water Treatment Plant

Residuals Management Program Development Document

General Instructions	Page	i
Section I - General Information	Pages	1 - 2
Section II – Biosolids Characterization	Pages	3 - 4
Section III – Land Application Plan	Pages	5 – 16
Signature Page	Page	17
Definitions	Pages	18 – 20

Appendix	Pages	22 - 41

**SURFACE WATER QUALITY DIVISION
MICHIGAN DEPARTMENT OF ENVIRONMENTAL QUALITY**

PURPOSE

The Michigan Biosolids Program establishes standards for the land application and beneficial recycling of biosolids in the state. Any treatment works treating domestic sewage proposing to land apply biosolids in the state shall prepare the enclosed Residuals Management Program (RMP) Guidance Document to obtain authorization. Authorization is required under the auspices of either an individual NPDES Permit or General Permit "Certificate of Coverage" (COC), dependent upon the type of permit held by the generating facility proposing to land apply.

For assistance on completing any section in this document you may contact the appropriate DEQ Surface Water Quality Division (SWQD) Office listed in Appendix A.

Industrial or commercial facilities with process wastewater entering the waste stream do not qualify for issuance of a biosolids land application permit. Contact the DEQ Waste Management Division in the appropriate district office for information on handling commercial or industrial wastes.

AUTHORITY

The Part 24 Rules, Land Application of Biosolids, of Part 31, Water Resources Protection, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, (NREPA) provide authority to issue Biosolids Land Application Permits. Completion and subsequent approval of this document meets the RMP requirements contained in Rule 2403, Land Application Permit of the Part 24 Rules. Failure to prepare and submit an RMP prior to land applying biosolids is a violation of Part 24 Rules and may result in penalties for such violation.

Rule 2403.

- (1) A generator or distributor shall have a valid permit before commencing any biosolids land application or distribution activity in the state of Michigan.
- (2) A generator or distributor shall submit a permit application on a form provided by the DEQ not less than 180 days before expiration of an existing permit, commencement of biosolids land application, or distribution of a biosolids derivative, except at retail.
- (3) All of the following provisions apply to a residuals management program:
 - (a) A generator shall submit a residuals management program for approval by the DEQ as required by its permit.
 - (b) A residuals management program submitted to the DEQ shall include all of the following information:
 - (i) Size and type of generating facility.
 - (ii) One year of records representing the volume and concentrations of pollutants in the biosolids.
 - (iii) Treatment process origin, for example, primary or secondary treatment and the volume of biosolids generated from each process.
 - (iv) A description of the treatment processes.
 - (v) Storage volume.
 - (vi) Transportation methods and spill prevention plan.
 - (vii) Land application method.
 - (viii) Land application site list.
 - (ix) Land application plan.
 - (x) Pathogen reduction method.
 - (xi) Vector attraction reduction method.
 - (xii) Monitoring program.
 - (c) Upon approval by the DEQ, the generating facility shall implement the approved residuals management program.
 - (d) A generating facility may modify the approved residuals management program by submitting a proposed modification to the DEQ for approval. The modification shall become effective upon approval by the DEQ.
- (4) A person shall land apply biosolids or prepare biosolids for land application in accordance with the requirements established in these rules.

The Michigan Department of Environmental Quality (DEQ) will not discriminate against any individual or group on the basis of race, sex, religion, age, national origin, color, marital status, disability, or political beliefs. Questions or concerns should be directed to the Office of Personnel Services, PO Box 30473, Lansing MI 48909

RESIDUALS MANAGEMENT PROGRAM**SECTION I – GENERAL INFORMATION****PLEASE TYPE OR PRINT**

FACILITY NAME Cadillac Waste Water Treatment Plant	NPDES or COC PERMIT NUMBER MI0020257
9. RESIDUALS HANDLING Provide total English dry tons per 365-day period of biosolids handled under the following practices: Amount generated at the facility: <u>250</u> Amount received from off site: <u>0</u> Amount treated on site (including blending): <u>250</u> Amount sold or given away in a bag or other container for application to the land: <u>0</u> Amount of bulk biosolids shipped off site for treatment or for sale/give-away in a bag or other container for application to the land: <u>0</u> Amount applied to land in bulk form: <u>250</u> Amount fired in biosolids incinerator: <u>0</u> Amount sent to municipal solid waste landfill: <u>0</u> Amount used or disposed by another practice: <u>0</u> Describe: _____ No Answer 13, 14, 15	10. RESIDUALS STORAGE Enter the volume of residual storage capacity at this facility. 1.6 ☒ million gallons or ☐ cubic feet 11. WASTEWATER FLOW RATE Provide design and actual flow rates in million gallons per day (MGD). Design flow <u>3.2</u> MGD Average Actual Flow <u>2.3</u> MGD 12. SERVICE AREA Enter the population serviced or NA if not applicable. <u>11500</u> 13. INDUSTRIAL PRETREATMENT PROGRAM Does the generating facility have, or are they required to have, an Industrial Pretreatment Program? (See Appendix B) Yes – On attached sheet provide list of Significant Industrial Users and list of pollutants monitored. No – Continue with item 14. 14. SEPTAGE Does your facility accept septage? Yes – Estimate amount received monthly _____ gal. No – Continue with item 15. 15. BLENDING AND TREATMENT FACILITIES Are (or will) biosolids from another facility (not including septage) be sent to your facility for treatment (including blending) or placement in a bag or other container for sale or give-away? Yes – Contact the Pretreatment and Biosolids Unit, Lansing No – Continue with item 16.
16. SOLIDS FLOW DIAGRAM, NARRATIVE DESCRIPTION, and PRODUCTION DATA Provide a flow diagram (using 8 1/2" x 11" paper if possible) showing the solids handling process through the facility. Identify all treatment units and sampling points. Please attach this diagram. Include a narrative description of all solids handling through the facility and provide solids production data of solids unit processes. Provide detailed information on residuals stabilization process including all solids handling unit processes (i.e. collection, dewatering, digestion, chemical feeds, storage). Include a narrative that briefly describes the history of the residuals handling practices at the treatment facility and any future plans for upgrade. OPTIONAL- To assist in calculating production data for your facility, Excel spreadsheets of various processes have been developed by the DEQ Operator Training Unit and are available from the appropriate DEQ SWQD Office listed in Appendix A or via the biosolids homepage at http://www.deq.state.mi.us/swq/ . If you are an industrial or commercial facility treating domestic sewage sludge only, the line diagram shall include all operations contributing wastewater including process and production areas, sanitary flows, cooling water and storm water runoff. Include a narrative, which provides a brief description of the manufacturing processes.

1. BIOSOLIDS CHARACTERISTICS Report one year biosolids monitoring data, and in no case less than three sampling events for the following Part 24 rules required parameters. Provide the actual analytical data sheets as an attachment. All sampling shall be representative of the biosolids being proposed to be applied to the land and in accordance with the minimum sample frequencies provided on the Page 10. Analytical methods shall be in accordance with R 323.2406 (2) Methods for Biosolids. Data that is available for parameters not specifically listed on this page shall be provided in the Pollutants of Concern table on page 4, Item 3 of this section.							
Parameter	Average Monthly Concentration	Maximum Monthly Concentration	Units	Number of Analyses	Method Detection Limit	Test Method	Sample Type

2. Pollutants of Concern

Do you believe or suspect that pollutants (other than parameters listed on the previous page) could be present in the biosolids to be land applied at concentrations that could possibly make them unsuitable for land application?

☐ Yes - Describe the circumstances below and provide representative analytical data for those pollutants of concern in Item 3.

☒ No

3. Report any biosolids monitoring data from the last permit cycle for parameters not specifically listed on the previous page. Include the actual analytical data sheets as an attachment. Upon submittal review, additional monitoring may be required if SWQD has reason(s) to suspect that the information provided (or not provided) does not adequately characterize the residuals proposed to be land applied. For assistance on completing this section or determining the necessity for completing this section, you may contact the appropriate DEQ SWQD office (see Appendix A).

FACILITY NAME Cadillac Was	NPDES or COC PERMIT NUMBER MI0020257
1. PATHOGEN / VECTOR ATTRACTION REDUCTION Describe, on this form or another sheet of paper, any treatment processes used at your facility to reduce pathogen and vector attraction properties in biosolids: Anaerobic and With sludge holding tanks ☐ Check this box if you need additional space for your answer.	5. VECTOR ATTRACTION REDUCTION Which vector attraction reduction option(s) is met for the biosolids at your facility? Attach the appropriate certification statement(s) (Appendix C) and documentation to demonstrate compliance. ☐ Option 1 (minimum 38 percent reduction in volatile solids) ☐ Option 2 (Anaerobic process, with bench-scale demonstration) ☐ Option 3 (Aerobic process, with bench-scale demonstration) ☐ Option 4 (Specific oxygen uptake rate, aerobically digested) ☐ Option 5 (Aerobic process plus raised temperature) ☐ Option 6 (Raise pH to 12 and retain at 11.5) ☐ Option 7 (75% solids with no unstabilized solids) ☐ Option 8 (90% solids with unstabilized solids) ☒ Option 9 (Injection below land surface) ☐ Option 10 (Covering active sewage sludge unit daily) 6. Describe, on this form or another sheet of paper, any secondary modes used at your facility to meet vector attraction reduction requirements: OPTION 1 (MINIMUM 38 PERCENT REDUCTION IN VOLATILE SOLIDS) ☐ Check this box if you need additional space for your answer.
2. PATHOGEN REDUCTION Which class of pathogen reduction does the biosolids meet at your facility? ☐ Class A - Continue with item 3. ☒ Class B - Continue with item 4.	
3. CLASS A BIOSOLIDS If Class A, check the alternative used and attach the appropriate certification statement(s) (Appendix C) and documentation demonstrating compliance. ☐ Class A – Alternative 1 ☐ Class A – Alternative 2 ☐ Class A – Alternative 3 ☐ Class A – Alternative 4 ☐ Class A – Alternative 5 (indicate which PFRP) ☒ (a) composting ☒ (b) heat drying ☒ (c) heat treatment ☒ (d) thermophilic aerobic digestion ☒ (e) beta ray irradiation ☒ (f) gamma ray irradiation ☒ (g) pasteurization ☐ Class A – Alternative 6 (attach PFRP equivalent documentation)	
4. CLASS B BIOSOLIDS If Class B, check the alternative used. Attach the appropriate certification statement(s) (Appendix C) and documentation to demonstrate compliance. Note Class B Site Restrictions on Page 7. ☐ Class B –Alternative 1 ☐ Class B –Alternative 2 (indicate which PSRP) ☒ (a) aerobic digestion ☐ (b) air drying ☐ (c) anaerobic digestion ☒ (d) composting ☐ (e) lime stabilization (pH at 25° C or equivalent)	7. RE-USE/DISPOSAL ALTERNATIVES Should the circumstances arise, describe alternative method(s) for the proper treatment, use or disposal of biosolids (include seeking authorization from the permitting authority). Haul to Approved Liscensed Landfill. ☐ Check this box if you need additional space for your answer.

1. ENVIRONMENTAL MANAGEMENT SYSTEM (EMS) Optional Would your facility possibly be interested in implementing a voluntary EMS and "Code of Good Practices" as administered by the National Biosolids Partnership? ☐ Yes -Information will be sent to you on implementing an EMS ☒ No	4. LAND APPLICATION METHOD Describe the methods utilized for land application. Sub Surface injection with an "A" Sludge Applicator ☐ Check this box if you need additional space for your answer.
2. TRANSPORTATION Describe the method of handling and transporting residuals from the treatment facility to the site of land application. We Use a Qualified Sub Contractor to Haul Our Sludge. Lowest Bid with Best References. ☐ Check this box if you need additional space for your answer.	5. APPLIER OVERSIGHT Describe the method of applier oversight. Include performance specifications and any training/certification requirements. See Appendix C for applier certification requirements. Get yearly report with all certifications needed. Do site inspections during and after application of biosolids. ☐ Check this box if you need additional space for your answer
3. SPILL PREVENTION / RESPONSE PLAN Describe your spill prevention measures and steps to be followed should a spill occur. Contain and Cleanup spills. We Will use appropriate equipment and manpower to clean up spills fast and efficiently. ☐ Check this box if you need additional space for your answer.

FACILITY NAME Cadillac Waste Water Treatment Plant	NPDES or COC PERMIT NUMBER MI0020257
6. REPORTING Describe your facility's reporting procedure (provide example forms, letters, etc. as an attachment). Specific reporting requirements are summarized in Appendix C. We send a report consisting of coverletterwaste disposal sheets and lab results to district office. Send yearly biosolids to EPA region 5. ☐ Check this box if you need additional space for your answer WASTE DISP SHEET NOT NECESSARY YOUNG REPORT TO DED	8. COMPLAINT RESPONSE Describe the procedure for responding to citizen complaints. Include details of any biosolids educational programs. We try to get persons name and visit them and explain our process to them. We recently have tested our biosolids and found out that they met Class "A" requirements. We try to educate and relieve the persons tension on this subject. ☐ Check this box if you need additional space for your answer
7. RECORDKEEPING Describe your facility's recordkeeping procedures and retention schedules. Specific recordkeeping and certification requirements are summarized in Appendix C. We keep facilities report for a period of at least a minimum of five years. In most cases longer. The last five years are kept in supervisors office. The year before that are kept in our archives. ☐ Check this box if you need additional space for your answer CPLRS KORT WDEF.	9. SAMPLING PLAN a. Describe the proposed sample frequency and quality control methods utilized to assure representative samples are obtained. Minimum Sample Frequencies are provided on Page 10. We only need to sample once per year but we test before every hauling cycle. This usually means we test oooooour biosolids 2 times a year. We mix our biosolids about a month before we haul and send out sample so that we have results before we haul. ☐ Check this box if you need additional space for your answer b. Describe the procedure for assuring that analytical results are below regulated limits and appropriate methods were used. Pollutant Limit Tables are provided on Page 11. We test our biosolids in house and we also send a split sample out to a commercial lab. We use our answers to confirm commercial labs results. We only use commercial labs test results in our reports. The commercial lab sends conformation of tests methods and QA/QC. ☐ Check this box if you need additional space for your answer WHOLE ARE SAMPLES COMBINED, HOW LONG MIXED BEFORE COMB HOW MANY SAMPLES TO COMPOSITE

On an attached sheet provide a copy of the following:

- A Farm Services Agency map (formerly ASCS) of the proposed application site with property boundaries, surface waters, and discharge location of field tiles when present.
- A copy of the soil test analysis that is no older than 2 years old at the time of land application.
- A copy of the plat map (or other map showing property dimensions) with the proposed land application site highlighted.
- A soil survey map with the land application site identified.

RESIDUALS MANAGEMENT PROGRAM**SECTION III – LAND APPLICATION PLAN****Land Application Site List**

Provide the following information for every new or existing site that you intend to use in the next five years (biosolids permit cycle). Each listed site should either have had a Site Identification Form with attachments submitted to the DEQ since January 1, 1998, or the completed forms should be included with this document. To add new sites to the Land Application Site List during the biosolids permit cycle, modify your RMP by submitting a completed DEQ Site Identification Form with attachments, a copy of your public notification letter and wait the required ten-day notification period. Use additional sheets as necessary.
