FILE

Mr. Jeffrey Dietlin
Water Resources Supervisor
Cadillac Wastewater Treatment Plant
200 North Lake Street
Cadillac, MI 49601

Dear Mr. Dietlin:

SUBJECT: Residuals Management Program (RMP) Submittal
Cadillac Wastewater Treatment Plant, NPDES No. MI0020257

A Residuals Management Program (RMP) has been submitted to the Surface Water Quality Division (SWQD) in the Cadillac District Office in accordance with your National Pollutant Discharge Elimination System (NPDES) permit.

Following discussion with SWQD staff, a revised RMP was submitted to this office April 15, 2002. The revised RMP and the attachments from the original submittal have been reviewed and are hereby approved with the following comments.

- **Section III-Land Application Plan, B.) Procedures, Question 9 – Sampling Plan**

Response to question 9 indicates that your facility intends to analyze solids prior to every hauling cycle (twice per year), although you did indicate that you may need to sample quarterly. The reported tonnage for the 2001 land application period was 327 dry tons, which exceeds the 320 dry ton limit requiring quarterly samples (4 times per year). Therefore, it is recommended that you consider revising your sampling plan to establish a consistent quarterly sampling program in case your facility exceeds the 320 dry tons-per-year limit again.

- **Section III-Land Application Plan, C.) Site Information – Land Application Site List (LASL)**

Please note that you are only authorized to use the sites identified on your LASL. To add new sites to your approved list, submit a completed MDEQ Site Identification Form with attachments, a copy of your public notification letter, and wait the required ten-day notification period. Please amend any Site Identification Forms when it becomes known that any of the information has changed, (i.e., new landowner, acreage, etc.)

Effective immediately, you are authorized to land apply biosolids in accordance with the conditions found in the approved RMP, Federal regulations contained in 40 CFR Part 503, and requirements established in the Part 24 - Land Application of Biosolids Rules (R323.2401 through R323.2418 of the Michigan Administrative Code). Please note that the permittee shall annually report the number of dry tons of biosolids generated that were applied to the land in the State of Michigan in the state fiscal year. The annual report shall include information required in R323.2413 (3) to (8), except R323.2413 (6)(b), (7)(b), and (8)(b). The report shall be submitted to the District Supervisor of the Surface Water Quality Division on or before **October 30** of each year.

This authorization may be revoked if: (a) the NPDES Permit is revoked or application for the Permit is denied; (b) there is any change in the chemical composition of the biosolids that causes them to no longer be acceptable for land application; (c) the permittee or any contractor or subcontractor fails to comply with the aforementioned terms and conditions of this approval; (d) there are continued and substantiated citizen complaints of nuisance odor; (e) there are instances of identified environmental impairment or unpermitted discharges to waters of the state or; (g) new state or federal regulations are promulgated which would cause this authorization to be invalid.

Adverse environmental impacts resulting from the use of land application sites are subject to the enforcement provisions of Parts 17, 31, 55, 111, 115, and 201 of the Natural Resources and Environmental Protection Act (NREPA), 1994 PA 451, as amended, and other applicable state and federal laws.

If you have questions, please contact Mr. Michael Person at 231-775-3960, extension 6266.

Sincerely,

Michael Stifler
Cadillac District Supervisor
Surface Water Quality Division
231-775-3960, Extension 6260
