Re: 2015'S POLLUTANT MINIMIZATION PLAN YEARLY STATUS REPORT

Dear Mr. Wade,

Enclosed, please find the Cadillac WWTP 2015 Pollutant Minimization Plan Yearly Status Report. I have also enclosed the Influent and Effluent Mercury results for 2015 also included is a report of mercury levels in Cadillac's Bio-solids.

There was no industry that came to town that had a potential of new mercury source and all of the previous potential mercury sources have not changed their processes. Because of this there is no updated list of potential mercury sources for the City of Cadillac.

A close Examination of the influent and effluent data shows very low values for mercury concentration for 2015. This level of mercury meets the goal of the Pollutant Minimization Program. We will continue to monitor the level of mercury in our effluent per our NPDES permit.

Please feel free to call if you have any questions.

Sincerely,

Douglas Langworthy, Assistant Supervisor
Cadillac Water Resources Dept.
