Tom,

I have some concern over a recent letter I received from one of my IPP permit holders.

After attending one of your regional meetings on PFAS I sent out a letter to my IPP holders telling them we would be surveying them for PFAs information in the near future.(please see attached letter dated 4/5/2018)

I received a letter back that seems to indicate that the WMRPD and the MRD are not on the same page. (please see letter dated 4/18/2018)

From the regional meetings I thought we were supposed to identify potential PFAS contributors by June 29, 2018 unless we request an extension. Once identified sampling could take place. Final report due in October.

Has the MDEQ changed its position in regards to timing?

Cadillac Utilities Department

April 5, 2018

Dear Industrial Permit Holder,

You may have heard news recently about perfluoroalkyl and polyfluoroalkyl substances (PFAS, also referred to as PFCs), especially the specific chemicals PFOS (perfluorooctane sulfonate) and PFOA (perfluorooctanoic acid). The Michigan Department of Environmental Quality (MDEQ), Water Resources Division (WRD), is requiring Wastewater Treatment Plants (WWTP) with Industrial Pretreatment Programs (IPPs) to evaluate potential sources of PFAS, investigate probable sources, reduce/eliminate the sources found, and take other actions to protect surface water quality as needed.

This is a letter informing you that you will be receiving a MDEQ survey in the near future regarding PFAS. Prior to the survey, The City of Cadillac is requesting you look into process chemicals you are using that contain PFAS. If you are currently using PFAS containing chemicals please notify me immediately and begin the process of finding a replacement chemical. We are trying to eliminate any potential sources of PFAS through the IPP program prior to potential mandatory sampling.

Please see attached PFAS list with the immediate action items being highlighted

Thanks,

SUGGESTED PFAS LABORATORY ANALYTES*

Below are recommended PFAS laboratory analytes for PFAS (Per and Polyfluoroalkyl Substances). This list is not exhaustive but reflects a list of chemicals that commercial laboratories are able to analyze for at this time as well as some contaminants that have been found in Michigan's environment. *Note that this is a suggested list and may change.

Staff researching potential PFAS sources should try to identify PFAS chemicals that may have been used at the facility in question and may need to base their analysis on what they find at specific sources.

PFAS Substance ¹	Acronym	Fluorinated Carbon Chain Length	Molecular Formula	CAS Registry Number	Minimal Analyte List ²
Perfluorobutanoic Acid	PFBA	C4	C ₃ F ₇ COOH	375-22-4	X
Perfluoropentanoic Acid	PFPeA	C5	C ₄ F ₉ COOH	2706-90-3	X
Perfluorohexanoic Acid	PFHxA	C6	C ₅ F ₁₁ COOH	307-24-4	X
Perfluoroheptanoic Acid	PFHpA	C7	C ₆ F ₁₃ COOH	375-85-9	X
Perfluorooctanoic Acid	PFOA	C8	C ₇ F ₁₅ COOH	335-67-1	X
Perfluorononanoic Acid	PFNA	C9	C ₈ F ₁₇ COOH	375-95-1	X
Perfluorodecanoic Acid	PFDA	C10	C ₉ F ₁₉ COOH	335-76-2	X
Perfluoroundecanoic Acid	PFUnDA	C11	C ₁₀ F ₂₁ COOH	2058-94-8	X
Perfluorododecanoic Acid	PFDoDA	C12	C ₁₁ F ₂₃ COOH	307-55-1	X
Perfluorotridecanoic Acid	PFTTrDA	C13	C ₁₂ F ₂₅ COOH	72629-94-8	X
Perfluorotetradecanoic Acid	PFTeDA	C14	C ₁₃ F ₂₇ COOH	376-06-7	X
Perfluorobutane Sulfonic acid	PFBS	C4	C ₄ F ₉ SO ₃ H	375-73-5	X
Perfluoropentane sulfonic acid	PFPeS	C5	C ₅ F ₁₁ SO ₃ H	2706-91-4	X
Perfluorohexane Sulfonic acid	PFHxS	C6	C ₆ F ₁₃ SO ₃ H	355-46-4	X
Perfluoroheptane Sulfonic acid	PFHpS	C7	C ₇ F ₁₅ SO ₃ H	375-92-8	X
Perfluorooctane Sulfonic acid	PFOS	C8	C ₈ F ₁₇ SO ₃ H	1763-23-1	X
Perfluorononane sulfonic acid	PFNS	C9	C ₉ F ₁₉ SO ₃ H	474511-07-4	X
Perfluorodecane Sulfonic acid	PFDS	C10	C ₁₀ F ₂₁ SO ₃ H	335-77-3	X
Perfluorooctane sulfonamide	FOSA	C8	C ₈ F ₁₇ SO ₂ NH ₂	754-91-6	X
4:2 Fluorotelomer sulfonic acid	4:2 FTSA	C4	₄ F ₉ CH ₂ CH ₂ SO ₃	757124-72-4	X
6:2 Fluorotelomer sulfonic acid	6:2 FTSA	C6	₆ F ₁₃ CH ₂ CH ₂ SO ₃	27619-97-2	X
8:2 Fluorotelomer sulfonic acid	8:2 FTSA	C8	₈ F ₁₇ CH ₂ CH ₂ SO ₃	39108-34-4	X
N-Ethyl perfluorooctane sulfonamidoacetic acid	EtFOSAA	C8	C ₈ F ₁₇ SO ₂ N(C ₂ H ₅)CH ₂ COOH	2991-50-6	X
N-Methylperfluorooctanesulfonamidoacetic acid	N-MeFOSAA	C8	C ₈ F ₁₇ SO ₂ N(CH ₃)CH ₂ COOH	2355-31-9	X

1. Branched and linear isomers should both be reported

2. This list is based upon a draft EPA list that is likely to change in the future and it is also based upon contaminants found by MDEQ in Michigan's environment as of 3/1/2018. It should not be assumed that this list is a permanent, exhaustive list and changes may occur as the science of PFAS contamination and analysis continues to evolve.

RE: Perfluoroalkyl and Polyfluoroalkyl Substances (PFAS)

Dear Mr. Langworthy:

In response to your correspondence dated April 5, 2018 regarding PFAS, we do not use any PFAS containing chemicals at the Wexford County Landfill nor do we have knowledge of PFAS in our leachate.

Currently, the Michigan Department of Environmental Quality, Waste Management and Radiological Protection Division, (WMRPD) is drafting statewide protocol for the collection of PFAS in water samples (i.e. leachate, groundwater). The WMRPD anticipates finalizing the sampling protocol by the end of August. In addition, the WMRPD and the Water Resources Division (WRD) have discussed the timing of the establishment of sampling protocol and the scheduling of sampling events for PFAS by IPP permit holders and/or POTWs. As such, the WRD has stated to the WMRPD that any request for an extension in sampling deadlines will be granted to POTWs that make the request.

Until such time that sampling protocol is established, we will not be able to collect representative samples at our facility for PFAS analysis.

Should you have any questions or comments concerning the above, please contact me.

Sincerely;

Vicki R. Garon, P.E.
