

PFAS POTW Effluent Monitoring Report v2

version 1.14

(Submission #: HQP-CM46-C1C5E, version 1)

Digitally signed by:
MiEnviro Portal
Date: 2026.06.17 14:58:14 -04:00
Reason: Submission Data
Location: State of Michigan

Details

Submission Alias PFAS POTW Effluent Monitoring Report

Submission ID HQP-CM46-C1C5E

Form Input

General Information and Attachments

Site Name:

Cadillac WWTP

Permit Number:

MI0020257

Did you sample for PFAS?

Yes

Laboratory Reports

Please upload complete laboratory report(s), including QA/QC portions and laboratory excel spreadsheets (commonly referred to as the Electronic Data Deliverable (EDD) file) for all results received since the last report was submitted.

PFAS Monitoring Data (1 of 1)

Effluent | 001A | 05/13/2026

Sample Stage:

Effluent

Sample Date (MM/DD/YYYY):

05/13/2026

Monitoring or Discharge Point (e.g. 001A or influent sample location):

001A

Flow (MGD):

2.44

Data Entry:

Please provide results in nanograms per liter (ng/L) or parts per trillion (ppt), which are considered equivalent. **For results that are non-detect, please enter a "<" symbol followed by the reporting limit (quantification level), for example: "<2.10".**

If your laboratory has provided an estimated value below the quantification level, please also report using the “<” symbol followed by the reporting level rather than the estimated value. For permitted facilities, sampling results are required to be reported in the table for the first 28 analytes listed below. Until one or more methods are promulgated by the USEPA for the analysis of PFAS in wastewater in 40 CFR Part 136, analyses may be performed using USEPA Method 1633A or another method of analysis that achieves required quantification levels. Once the USEPA promulgates one or more methods for the analysis of PFAS in wastewater, only promulgated methods may be used for aqueous analysis for compliance determination with Part 31 of NREPA. All results obtained by that method shall be reported.

Please select data qualifiers as appropriate from the drop-down list. If this list does not include the appropriate qualifier, you may use the comment box to report data issues.

The table lists the Acronym and Chemical Abstract Service (CAS) number for each analyte. Full parameter names and additional information can be found in the [PFAS Minimum Required Laboratory Analyte List](#).

*These parameters are not part of the analysis conducted under USEPA Method 1633A and therefore are not required.

These parameters are not part of the analytical contract under CCR. Analytical fees for these parameters are not required. EGLE requests the results of these parameters if reported by your laboratory.

Additional Information

Is there any additional information (e.g., documents or comments) that you would like to provide, related to your report?

No

Certification Statement

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
