Details

1. Control Authority Program Information

? Note: Reporting period is January 1 to December 31 of previous calendar year.

1. Reporting Period - If you are submitting a late report for a reporting period prior to January 1-December 31 2017, please update the dates below:

Reporting period start date:	Reporting period end date:
01/01/2017	12/31/2017

2. Did the Control Authority adopt any local limits within the reporting period?

NO

3. Did the Control Authority conduct a local limits evaluation within the reporting period?

NO

4. Did the Control Authority add or delete pollutants from its list of local limits during the reporting period?

NO

5. Please identify if there were any problems (e.g., pass-through, interference, violation of NPDES permit limits) with the effluent discharge of this POTW covered by this Pretreatment Program during the reporting period. See 40 CFR 403.3(k) and (p) and [DEQ regs].

NO

6. Please identify if there were any problems with the use or disposal of biosolids or sewage sludge for this POTW during the reporting period.

NO

2. SIU/CIU List

IMPORTANT:

Leave the "NPDES ID" column blank. The NPDES ID is a unique identifier for each facility in EPA's ICIS-NPDES database. It does not imply that the facility has a direct discharge (NPDES) permit. NPDES IDs will be assigned by DEQ as we enter the SIU/CIU information into MWaters. You will be notified when the NPDES IDs are available (before the next IPP Annual report is due). Please add the NPDES IDs to your copy of the SIU/CIU List Table and save it for next year's IPP Annual Report. We also recommend that you update the SIU/CIU List Table at least annually with additions, deletions and revisions as a reference for your next NPDES permit application.

4. Annual Pollutant Monitoring Summary

Your NPDES Permit requires the following:

? A summary of results of all the sampling and analyses performed of the wastewater treatment plant's influent, effluent, and biosolids conducted in accordance with approved methods during the reporting period.

? The summary shall include the monthly average, daily maximum, quantification level, and number of samples analyzed for each pollutant.

? At a minimum, the results of analyses for all locally limited parameters for at least one monitoring event that tests influent, effluent and biosolids during the reporting period shall be submitted with each report, unless otherwise required by the Department.

Please use the template provided below to comply with this requirement:

Remember this is a SUMMARY. Please DO NOT upload your laboratory bench sheets or the analytical reports from your contract laboratory. If District IPP staff have questions about the data, they will contact you directly and request additional information.

Please note:

The summary should include the results (monthly average and daily maximum) of all the sampling and analysis of the WWTP influent, effluent and biosolids conducted during the previous years, not just the results of a single sampling event for locally limited parameters. For example, if you have a local limit for TSS and your NPDES Permit requires daily monitoring for TSS, the results of all 365 days' influent and effluent monitoring should be included in the pollutant monitoring summary.

1. Upload a copy of the annual pollutant monitoring summary.- Attachment
