

Attached please find copies of the Draft Groundwater Discharge Permit, Public Notice and Certification of Public Notice form, for the groundwater discharge identified on the permit application as Wexford County Landfill.

Due to budget restrictions, the Department of Environmental Quality (DEQ) can no longer provide the service to applicants of public noticing permits in local newspapers or periodicals. Public noticing is now the responsibility of the applicant. Rule 2117 of the Part 21 Rules states the following regarding public noticing of permits:

- (1) The department shall prepare and sign a public notice of an application for a national permit, or a state permit as deemed appropriate by the department, and of the proposed determination to issue or deny a permit for the proposed or existing discharge identified in the application. The notice shall be circulated within the geographical area of the proposed or existing discharge in 1 or more of the following ways:
 - (a) **Posting of the notice in the post office or other public buildings** of the municipality nearest the premises of the applicant in which the discharge is or will be located.
 - (b) **Posting of the notice at the entrance** to the applicant's premises or nearby.
 - (c) **Publishing the notice in 1 or more newspapers** of general circulation in the area of the applicant, or if appropriate, in an applicable periodical.
- (2) A copy of the notice shall be transmitted to the permit applicant and shall be available at the department office in Lansing and at the department district office nearest to the geographical location of the applicant. Any person may make a written request for a copy of the notice which will be mailed to him or her.

The draft permit must be public noticed for a period of 30 calendar days. You can choose to public notice your permit using one or more of the above options. In addition to providing you with an electronic copy of the draft permit, the DEQ will make the draft permit available in our district office and include it in the Public Notice section of the Groundwater Discharge permit web site.

Please note that after you have public noticed your permit, you must complete and return to the DEQ a "Certification of Public Notice" form that identifies how the draft permit was public noticed and the time interval of the public notice. Please fill out and sign the attached form and return it to the address listed on the form.

Only one certification form is needed even if the draft permit is public noticed by more than one method or at more than one location. It is only necessary to identify the various methods on the form.

Please contact me if you have any questions.
