Fibertec Project Number: A03420 Amended
Project Identification: NPDES Additional Monitoring /
Submittal Date: 08/16/2021

Mrs. Cindy Tomaszewski
City of Cadillac
200 Lake Street
Cadillac, MI 49601

Dear Mrs. Tomaszewski,

Thank you for selecting Fibertec Environmental Services as your analytical laboratory. The samples you submitted have been analyzed in accordance with NELAC standards and the results compiled in the attached report. Any exceptions to NELAC compliance are noted in the report. These results apply only to those samples submitted. Please note TO-15 samples will be disposed of 7 calendar days after the reporting date. All other samples will be disposed of 30 days after the reporting date.

This report has been amended to lower the reporting limit on pentachlorophenol. This report replaces the report issued on August 30, 2021.

If you have any questions regarding these results or if we may be of further assistance to you, please contact me at (517) 699-0345.

Sincerely,

A handwritten signature in black ink that reads "Stacy Kotecki". The signature is written in a cursive, flowing style.

By Stacy Kotecki at 5:24 PM, Aug 31, 2021

For Daryl P. Strandbergh
Laboratory Director

Client Identification:	City of Cadillac	Sample Description:	Effluent Grab	Chain of Custody:	195787
Client Project Name:	NPDES Additional Monitoring	Sample No:		Collect Date:	08/16/21
Client Project No:	NA	Sample Matrix:	Wastewater	Collect Time:	13:30

Sample Comments:

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds by GC/MS

Method: EPA 0624.1

Aliquot ID: A03420-002C
Description: Effluent Grab

Matrix: Wastewater

F: (231) 775-8584

Definitions/ Qualifiers:

- A:** Spike recovery or precision unusable due to dilution.
B: The analyte was detected in the associated method blank.
E: The analyte was detected at a concentration greater than the calibration range, therefore the result is estimated.
J: The concentration is an estimated value.
M: Modified Method
U: The analyte was not detected at or above the reporting limit.
X: Matrix Interference has resulted in a raised reporting limit or distorted result.
W: Results reported on a wet-weight basis.
***:** Value reported is outside QC limits

Exception Summary:

- F-** : Recovery from the spiked aliquot exceeds the lower control limit (matrix spike or matrix spike duplicate).
G- : Recovery of the associated Surrogate Compound exceeds the lower control limit. Results may be biased low.
J1 : Concentration qualifier - reported value was obtained from a reading that was less than the CRQL but greater than or equal to the MDL
L+ : Recovery in the associated laboratory sample (LCS) exceeds the upper control limit. Results may be biased high.
V+ : Recovery in the associated continuing calibration verification sample (CCV) exceeds the upper control limit. Results may be biased high.

Analysis Locations:

All analyses performed in Holt.
