Everything captured on this chain pertains to the sample collected 8/16/21. I sent you a separate report for the resampling. The non-detect sample was a re-extraction of the original sampling set.

On Tue, Sep 7, 2021 at 4:48 PM Cindy Tomaszewski <ctomaszewski@cadillac-mi.net> wrote:

Kelsey –

Is this information (below) for the reanalysis of the sample originally collected on 8/16/21? Did you re-extract (a second portion of) the original sample; or rerun the original extract?

Thank you,

Cindy A. Tomaszewski

Lab Supervisor

Good Evening Cindy

Your reanalysis of the sample came back as non-detect or <0.10 micrograms/ Liter. The lab's original findings are yet defensible. We suspect interference of something else reading as Benzidine. There will be no charge for the reanalysis not the resampling.

Please let me know if you have any further questions; otherwise, enjoy your holiday!

Hey Cindy,

Confirming your samples have arrived and your cooler is ready to be shipped back with replacement bottles later today.

I will advise as soon as I have results to report.

Best,

Kelsey

Sending 3 L sample your way (UPS Next Day), today. The cooler and bottles did not come from Paragon - please replace bottles and return cooler to our address.

Any questions, just send a reply or give us a call. Thanks,

Cindy A. Tomaszewski

Understood, we will re-analyze tomorrow and, due to the run time, extract the data Thursday for reporting. We utilize 1L in analysis, but typically ask for 3L as some shatter in shipment so having another for quality control and or reanalysis such as this it is worthwhile to receive at least 2L.

On Tue, Aug 31, 2021 at 8:35 AM Cindy Tomaszewski <ctomaszewski@cadillac-mi.net> wrote:

Please rerun what you have. You only need to run Method 605.

We will also resample (for method 605) – how much sample do you need? Glass amber 1-L, no preservative?

Thanks,

Cindy A. Tomaszewski

Good Morning,

I have located the sample and we have sufficient quantity to re-run the analysis. As the analysis falls out of hold time for compliance please confirm if you wish to proceed with a re-run or resample?

Thank you!

Hi Cindy,

Our analyst was surprised by the return of 1.8 micrograms/ Liter; however he did determine it was defensible relative to the fellow samples that were batched with it. I will look at the remaining sample tomorrow and determine if there is sufficient quantity to proceed with reanalysis. Please be advised that the reanalysis will fall outside of hold time for compliance purposes.

Talk to you soon,

Kelsey

Kelsey –

I am really surprised by the hit on benzidine.

Is it possible for you to rerun the sample you have? Do you have enough sample volume and is it “not expired”?

Please reply or call my cell (231-878-6230) as soon as you can. Thank you,

Cindy A. Tomaszewski

Subject: Final Report and Invoice for Paragon WO 371828

Hello,

Attached are the final reports and invoices for samples received. Please review your reports carefully to ensure it matches your expectations, and complies with your state or city issued permits. Hello,

To ensure prompt processing, please include the Invoice Number and Account ID on your payment and/or remittance.

Please don't hesitate to reach out to me if you have any questions.

Thank you for your business and have a great day.
