Subject: IPP Annual Report

Patrick,

I reviewed the 2025 IPP Annual Report and noticed a couple of items that need to be corrected. On the report form, for question 2 "Did the Control Authority conduct a local limits evaluation during the reporting period?" you answered no. The MAHL study for benzidine, beryllium, bromomethane, and phenol was conducted during the reporting period, so the answer to this should be yes.

On the monitoring data summary table, phenol isn't included as a local limit, and so no data is provided. In the same table, data is provided for 1,2-dichlorobenzene, selenium, chloroform, lindane, PCB's, or styrene, but the limits aren't stated.

Please could you revise and resubmit the report with the appropriate corrections.

Thank you,

Claire Lowe
