Subject: RE: Cadillac WWTP Application Review

Hi Tom,

The questions below look like they are intended to determine if the POTW has any categorical processes, or pass through/interference which would result in them needing an IPP. As they already have an IPP program, for permitting purposes I don't think this information would change anything with regard to their permit.

Subject: Cadillac WWTP Application Review

Hi Claire,

I am reviewing the application for reissuance for the Cadillac WWTP. For the IPP/SIU information section, the facility uploaded information for 17 SIUs but did not answer the following three questions included in our application for any of them:

Describe all of the industrial processes that affect or contribute to the SIU's discharge.

Describe all of the principal processes and raw materials that affect or contribute to the SIU's discharge.

Describe any problems at the treatment plant or in the collection system (e.g., upsets, pass through, interference, blockages) attributed to waste or wastewater discharged by this SIU during the last three years.

These questions are not marked as required in our application. Although they are not marked required, I wanted to verify with you as to whether or not I should request any additional information from them relating to these questions. Would you mind taking a look at this application and let me know if they provided adequate SIU information? Here is the link to the

app: <https://miwaters.deq.state.mi.us/nform/app/#/submissionversion/B348CDDA-F85C-4006-AD83-5583D60A9273/forminput>.

Thank you!
