Elaine and Patrick,

The revisions and the new sampling calendar look fine to me. As this is an alternative sampling plan, it needs approval, so if you're happy with it, Patrick, respond and let me know, so I can put it under the correct schedule in MiEnviro on your behalf and enter the approval.

Elaine,

That new sampling plan looks great except for maybe one change if possible. We do not want to sample on the 26<sup>th</sup> because of hold times and shipping. We propose to sample Tuesday and Wednesday the first week and Monday the second week. I attached a proposed schedule for you to review and make sure we are ok.

Hi Claire –

Thanks for the quick response.  
Please find a revised sampling plan which clarifies that phenol is a grab sample and changes the sampling at the WWTP and domestic / background locations over 4 weeks. Note that if sampling commences on November 17 as planned, it will continue during the week of Thanksgiving, so the only sample taken that week will be on a Wednesday to avoid the holiday weekend.

Thanks,  
Elaine

**Subject:** RE: Cadillac Additional Local Limits Parameters - Proposed Sampling Plan

Hi Elaine,

I reviewed the plan and the only comments I have are that phenol should be collected as a grab, and I have concerns about trying to compress sampling into a single week instead of over the month used in the previous plan. It looks like the motivation for doing that is to complete the process by the end of the year. I think there is confusion about the requirement to implement all the other limits that were already determined to be approvable by the end of the year in the letter sent on October 13. The permit required these remaining limits to be submitted back in January, so there's no need to compress the sampling for a due date that's already passed. If you agree, please make that modification and resubmit. Otherwise give me a call and we can discuss.

Thanks,

Claire Lowe

Hi Claire –

Attached is our proposed sampling plan for the four additional parameters that have a local limit submittal deadline of December 31, 2025. Please let us know if you have any questions or comments. The City would like to collect samples during the week of November 17.

Thanks,

Elaine
