Re: Chemicals of Concern in 3M™ Dyneon™ Products

Dear Valued 3M Customer,

This letter is in response to your question concerning the presence of certain chemicals of concern in the products listed below:

3M™ Dyneon™ Fluoroplastic THV 500GZ
3M™ Dyneon™ Fluoroplastic THV 815GZ
3M™ Dyneon™ Fluoroplastic THV 505ESDZ
3M™ Dyneon™ Fluoroelastomer FE 5830Q

3M does not intentionally add PFOA, PFOS, or any of the PFAS chemicals found in the *SUGGESTED PFAS LABORATORY ANALYTES* list you provided or any derivatives of these substances, in the manufacture or formulation of these products. However, even when these substances are not intentionally used in the manufacturing of these products, they may still be detected at extremely low (ppb level) quantities as unintended impurities.

In preparing this response, 3M has relied in part on information provided by 3M suppliers. I trust the above information is responsive to your request.

Thank you for using 3M products. Please contact me at dlates@mmm.com if there are any additional questions.

Sincerely,

A handwritten signature in black ink, appearing to read "David Lates".
