

Biosolids PFAS Monitoring Report

version 1.7

(Submission #: HQQ-JWPA-R1S8B, version 1)

Digitally signed by:
MiEnviro Portal
Date: 2026.08.05 07:46:03 -04:00
Reason: Submission Data
Location: State of Michigan

Details

Submission ID HQQ-JWPA-R1S8B

Form Input

General Information and Attachments

Site Name:

Cadillac WWTP

Permit Number:

MI0020257

Was a biosolids sample collected and tested for PFAS with the intent to land apply those biosolids?

Yes

Laboratory Reports

Please include complete laboratory report(s), including QA/QC portions, chain of custody, and laboratory excel spreadsheets (commonly referred to as the Electronic Data Deliverable (EDD) file) for all results received since the last report was submitted.

We request that all parameters in the [PFAS Minimum Required Laboratory Analyte List](#) be included.

Laboratory Reports (results in ug/kg)

PFAS Biosolids Monitoring (1 of 1)

Biosolids Grab results from 07/22/2026

Biosolids Sample Date (MM/DD/YYYY):

07/22/2026

Was the sample a composite or a grab?

Grab

Was the sample collected representative of biosolids?

Yes

Data Entry:

Please provide results in micrograms per kilogram ($\mu\text{g/Kg}$) or parts per billion (ppb), which are considered equivalent. **For results that are non-detect, please enter a "<" symbol followed by the reporting limit (quantification level), for example: "<2.10"**. If your laboratory has provided an estimated value below the quantification level, please also report using the "<" symbol followed by the reporting level rather than the estimated value. For permitted facilities, sampling results are required to be reported in the table for the first 28 analytes listed below. Until one or more methods are promulgated by the USEPA for the analysis of PFAS in biosolids in 40 CFR Part 136, analyses may be performed using USEPA Method 1633A or another method of analysis that achieves required quantification levels. Once the USEPA promulgates one or more methods for the analysis of PFAS in biosolids, only promulgated

methods may be used for solids analysis for compliance determination with Part 31 of NREPA. All results obtained by that method shall be reported.

Please select data qualifiers as appropriate from the drop-down list. If this list does not include the appropriate qualifier, you may use the comment box to report data issues.

The table lists the Acronym and Chemical Abstract Service (CAS) number for each analyte. Full parameter names and additional information can be found in the [PFAS Minimum Required Laboratory Analyte List](#).
