Cindy,
I have attached the letters you requested for biosolids incorporation.
Thanks Doug

Due to unforeseen circumstances with the application equipment attachment used to direct inject biosolids, we will not be able to use direct injection for this application of the contract.

Our application equipment is a unique style compared to the most popular version of commonly used applicators so the servicing dealer gave us a window of replacement or rebuild that could outside of 3 months.

Midwest Injection fully understands that they will abide by the rules set forth by the Michigan Department of Environmental Quality and will take great care in applying biosolids and making sure that all biosolids are incorporated as applied and no biosolids are visible within six hours of application.

The rules set forth are:

- 0-6% slopes will warrant 1 pass application. If there is any pooling or surface water the operator shall reduce the application rate and work in the pooling bio solids.
- 6-12% slopes will warrant 1 pass application with an additional dry pass to work in the bio solids.

Midwest Injection Incorporated also agrees upon return for additional application they will have the direct injection toolbar.

We appreciate your understanding and we look forward to working with the City of Cadillac and the Michigan DEQ for many years to come.

Sincerely,

RE: Fall Biosolids Application

Cindy,

Per our conversation I'm writing to inform you we will be incorporating biosolids for our fall application due to equipment malfunction of our contracted haulers. I have attached a letter from the haulers explaining their situation.

As you stated for our fall haul we intend to do the following:

- 0-6% slopes will warrant 1 pass application. If there is any pooling or surface water the Operator shall reduce the application rate and work in the pooling biosolids.
- 6-12% slopes will warrant 1 pass application with an additional dry pass to work in the biosolids.

If you need anything else from me please contact me at 231-775-2841 or 231-510-0238.

Thanks,
