

GRETCHEN WHITMER
GOVERNOR

STATE OF MICHIGAN
DEPARTMENT OF
ENVIRONMENT, GREAT LAKES, AND ENERGY
CADILLAC DISTRICT OFFICE

LIESL EICHLER CLARK
DIRECTOR

April 29, 2020

VIA EMAIL

Mr. Jeffrey Dietlin, Superintendent
Cadillac Wastewater Treatment Plant
1121 Plett Road
Cadillac, Michigan 49601

Dear Mr. Dietlin:

SUBJECT: Residuals Management Program (RMP) Modified-FY20
National Pollutant Discharge Elimination System (NPDES)
NPDES Permit No. MI0020257
Designated Name: Cadillac Wastewater Treatment Plant (WWTP)

The Michigan Department of Environment, Great Lakes, and Energy's (EGLE), Water Resources Division (WRD), has reviewed the RMP Modification Request, received via Miwaters, on February 11, 2020, seeking to revise the previous authorization to surface apply biosolids generated at the Cadillac WWTP located at 1121 Plett Road, Cadillac, Michigan, Wexford County, in accordance with the requirements of the above listed NPDES permit.

Included with the modification request was documentation demonstrating the Cadillac WWTP meets the Exceptional Quality (EQ) designation for biosolids, through Class A, Pathogen Reduction requirements set forth in section R323.2414(2)(f) of the Michigan Part 24 Rules – Class A, Alternative 4. Please note, while it appears those records meet the state and federal requirements for Class A EQ, the Environmental Protection Agency (EPA) does not recommend facilities use Alternative 4 to demonstrate Class A. This is due to the lack of viable helminth ova and enteric viruses typically found in wastewater. Although they may not recommend it, they do not specifically prohibit the use of it.

Also included with the submittal, was documentation the WWTP met Vector Attraction Reduction Requirements through section R323.2415(4)(a) of the Michigan Part 24 Rules - reducing volatile solids by 38 percent.

The Cadillac WWTP RMP Modification request is hereby approved with the following conditions:

- Surface application of biosolids to slopes greater than 6 percent.
 - A visual inspection should take place and if any pooling of applied biosolids is evident at the base of slopes, application should cease, and measures taken to uniformly apply biosolids.
 - Slopes greater than 12 percent should not be utilized for surface applications.

- Meets Class A, EQ designation each fiscal year this modification is utilized.

For future Biosolids Annual Reports where the WWTP is certifying it met compliance for Class A/EQ Criteria, the following documentation should be provided:

- The month during land application - raw total volatile solids prior to digestion, treated total volatile solids post digestion, and calculations determining how 38 percent reduction is achieved.
- The months prior to (or, *during*) the land application month - All pathogen samples collected.
- All digestion temperatures for the months from the time of pathogen sample collection through the land application month.

By this authorization, the Cadillac WWTP shall also comply with the standards and requirements contained in Title 40 of the Code of Federal Regulations, Part 503, Standards for the Use or Disposal of Sewage Sludge; and the Part 24 Rules, Land Application of Biosolids, promulgated pursuant to Part 31, Water Resources Protection, of the Natural Resources and Environmental Protection Act, 1994, as amended (NREPA).

This authorization shall immediately be revoked if: (a) either the permit or RMP is revoked; (b) the application for a permit is denied; (c) there is any change in the chemical composition of the biosolids that cause them to no longer be acceptable for land application; (d) the permittee or any contractor or subcontractor fails to comply with the aforementioned terms and conditions of this approval; (e) additional information indicates the biosolids are no longer acceptable for land application or are causing environmental contamination; or (f) new state or federal regulations are promulgated that would cause this authorization to be invalid.

Adverse environmental impacts resulting from the use of land application sites are subject to the enforcement provisions of Part 17, Michigan Environmental Protection Act; Part 31; Part 55, Air Pollution Control; Part 111, Hazardous Waste Management; Part 115, Solid Waste Management; and Part 201, Environmental Remediation, of the NREPA, and other applicable state and federal laws.

Should you require further information, please contact Ms. Cindy Sneller at 616-401-2471; snellerc@michigan.gov; or EGLE, WRD, Grand Rapids District Office, 350 Ottawa Avenue, NW, Grand Rapids, Michigan 49503.

Sincerely,

Brian W. Jankowski
Cadillac District Supervisor
Water Resources Division
