Grand Rapids, MI 49503

Subject: Amendment to Existing Residual Management Practice (RMP)

Dear Ms. Sneller,

The City of Cadillac would like the State to amend the City of Cadillac's RMP permanently as outlined in the letter (attached) written by Dave Schipper with the following exceptions :

Item one – The City would like to surface apply when it is applicable on hay land without the necessity of being at storage capacity.

Item Four – The City would like to surface apply at slopes greater than 6%.

The City of Cadillac does not wish to use surface application as a primary land application process. The City would however like the option to do so. The City of Cadillac will only land apply when Class A EQ standards are met along with a minimum of 38% Volatile reduction. The City currently has a fair amount of land that is in the program in hay. The City would like to have the ability to apply on this land while it is still being farmed for hay without disturbing the soil.

If you have any questions, please feel free to contact me at 231-510-0238.
Thanks Doug

Douglas Langworthy
