Subject: RE: Cadillac WWTP - DMRQA Study 45

Hello Cindy and Patrick,

EGLE WRD staff have re-evaluated your DMRQA Study 45 submission and found all permit parameter results acceptable. The language within the violation regarding the Total Solids analyte and missing corrective action plan has been removed. Although, there will still be a violation generated for the missing signed data report form, lab checklists, and signed analyte checklists, as required by the study. If you have any more questions or concerns, please reach out to me.

Thank you very much for bringing this to my attention.

Sincerely,

Aaron Kline

Aaron -

Following up to our phone conversation this afternoon. Please find (attached) the signed data report form, lab checklist, and signed analyte checklists for Study 45.

Additionally, Total Solids is not a program parameter for our NPDES Permit or the DMR-QA. The failed PT result to which you are referring is not applicable.

If you have any additional questions, just send a reply or give me a call. Thank you,

Cindy A. Tomaszewski

Lab Supervisor

Subject: Cadillac WWTP - DMRQA Study 45

Good afternoon, Patrick and Cindy,

The results of the EPA Discharge Monitoring Report, Quality Assurance (DMRQA) Study 45 program (notification, testing, reporting) have been reviewed. The city of Cadillac failed the Total Solids analyses. In addition, the city failed to send the signed data report form, lab checklists, and signed analyte checklists, as required. The city also failed to submit a corrective action for Total Solids, as required.

The failure to satisfactorily complete the EPA DMRQA Study 45 is a violation of the Clean Water Act (CWA) Section 308 and Parts 21 and 31 of the Natural Resources and Environmental Protection Act, as amended (NREPA). A violation has been generated in MiEnviro to reflect the Failed Study results. If you have any questions about this, please let me know.

Thank you,

Aaron Kline
