
News Release

Normal Water/Sewer Use Restored for West Areas of City and LMSA

For Immediate Release – April 24, 2026 – UPDATE - City of Cadillac Responds to Historic Flooding

- Monitoring of areas that have been impacted by flooding continues. Emergency closures, and plans are in place to protect public safety, critical infrastructure, and the community as we navigate this current State of Emergency. Please respect all temporary road and park closures. Many public and private agencies are assisting.
- We have complimentary sand available at our Public Works Facility located at 1001 6th Ave and complimentary bags are available at Salvation Army located at 725 Wright Street.
- Drinking Water Sampling Kits Available for Flooded Residential Properties on Private Wells
 - A complimentary kit for sampling drinking water from a residential well may be picked up from the drinking water lab (1121 Plett Rd) Mon-Thursday between 7:00am-3:00pm or the City utilities office (200 N Lake St) Mon-Friday between 9:00am-5:00pm.
 - This kit includes a sample bottle and instructions to test for presence/absence of total coliform bacteria.
 - Questions about drinking water testing may be directed to the City lab at 231-775-2368. Questions about flood water impact to a residential well should be directed to the Wexford County Sanitarian, Jacquelyn Simon at 231-876-3842.
 - There is a required \$25 test fee, that is payable by check or cash (exact please, no change available) when sample is dropped-off at the lab. Alternatively, can also pay with credit/debit card at City Hall before bringing the sample to the lab, just bring the receipt.
- Army Corps of Engineers are still on-site and have concurred with flood relief pumping to try to move floodwater at Leeson/Division. In summary, a dam was constructed near the Viking Learning Center that has allowed the City to begin relief pumping efforts in the Leeson/Division flood zone, and water levels decreased approximately 10.5" as of yesterday.
- The County Emergency Manager coordinated a response from the Michigan State Police Aviation Unit yesterday. City personnel, members of the Army Corps of Engineers, and emergency management personnel performed an aerial assessment of the flood zones as well as the wider flood water movement through the area. This information has helped in determining the best mitigation strategies of the current state of emergency in addition to helping understand how the area is changing. The information collected will also be highly valuable while evaluating future planning/community recovery strategies.
- **PLEASE DO NOT DRIVE OVER, WALK ALONG, OR STAND NEAR ANY HOSES**
- **PLEASE RESPECT & ADHERE TO ALL INTERSECTION CLOSURES**

Who to call for assistance?

- Emergencies, call 9-1-1.
 - DO NOT POST REQUESTS FOR EMERGENCY ASSISTANCE ON SOCIAL MEDIA
- Non-Emergencies, dial 231-779-9211
- General information and access to resources for assistance, dial 2-1-1.

Additional Information, Areas of Concern and Closures

- Floodwater that has and is flooding area properties is primarily from the lakes and surrounding swamp areas and is not from a burst or broken sanitary sewer main, water main, or from the City's lift station getting damaged.
- There is no boil water alert in place for anyone in the City.
- Road/Facility Closures:
 - Leeson Ave. at Division St., including areas immediately adjacent
 - Waldo/Elmer St. and Colfax/Elmer St. intersection closures
 - Chestnut St. from Lake St. to Linden St., and from Leeson St. to Huston St.
 - Huston St. (Detour on Seneca to Wright St. to reduce traffic on the gravel portion of Huston St.)
 - North Blvd. from Chestnut to M-115
 - Newland St. from Kenwood Rd. to North Blvd.
 - Alexander St. from Kenwood Rd. to North Blvd.
 - Sunset Ln. is closed mid-block between Selma St./Colfax St. and Colfax St./Lake Dr.
 - Selma St. from Sunset Ln. to Lake Cadillac
 - Lakeshore Dr.
 - Forest Ln.
 - Benedict Ct.
 - Baker St.
 - Lakeshore Park along Chestnut St. and Lake St.
 - City docks behind the Rotary Pavilion
 - Kenwood Park
 - The Clam River Greenway
 - City boat launches on Chestnut St. and in Kenwood Park are closed

Personal Safety Guidelines

- Respect all road/parks closures. Do not drive through flooded areas. Never cross moving water.
- Stay away from flooded areas near electrical equipment. Never walk, drive or wade through floodwater that may be near power lines, substations, transformers or other electrical infrastructure. Learn more safety tips.
- Be alert to crews working along roads. Drivers should slow down or stop and wait for oncoming traffic to clear so they can go safely past.
- Never use a generator in an attached garage, basement, enclosed patio or near any air intakes. Doing so could cause a generator to produce hazardous levels of carbon monoxide, an odorless, colorless and deadly gas.
- Stay at least 25 feet away from downed power lines, and report unguarded downed lines by calling 9-1-1 and Consumers Energy at 800-477-5050. Consumers Energy reminds people that falsely calling in downed lines slows down the restoration process for everyone.
- See following tips from the District Health Department #10 if you are on a private water well or septic system.
