

BASIS FOR DECISION MEMO
FACILITY CLASSIFICATION
October 17, 2014

Facility: Cadillac Waste Water Treatment Plant

Address: 1121 Plett Road, Cadillac, Michigan 49601

NPDES or Groundwater Permit No. MI0020257

Determination By: Jamie Wade

Systems Serving the Public

1. Population served (design population equivalent): <10,500

2. Type of treatment facility: grit settling, activated sludge, RBC

3. Wastewater Characteristics and volume:

Annual average design flow: <10 MGD

% Sanitary flow: _____ % Industrial flow: _____

Design influent concentrations:

Permit limitations:

BOD _____

BOD _____

TSS _____

TSS _____

NH3-N _____

NH3-N _____

Phosphorus _____

Phosphorus _____

4. Use and nature of the receiving water (TMDL reach, trout stream, low flow stream, water intake):

Clam River is a trout stream also used for recreational canoeing, kayaking and swimming.

Explanation of Determination [Identify the special condition(s) or circumstance(s) that justifies a higher or lower level classification]:

Multiple biological treatments, IPP program, receiving waters
