Section 1. Applicant Information

??Please provide the name of the entity that will be legally responsible for the permit in the "Company" field. Do not include the first/ last name of an individual. Contact information will be collected in another section.

Applicant Information

Applicant/Legal Entity Name and Address

Prefix: Mr.

First Name: Jeffrey

Last Name: Dietlin

Company: City of Cadillac

Title: Director of Utilities

Ext: 124

Phone: 231-775-0181

Fax: 231-775-0906

Email: utilities@cadillac-mi.net

Applicant/Legal Entity Address

Address Line 1: 200 North Lake Street

Address Line 2: NONE PROVIDED

Description: NONE PROVIDED

City: Cadillac

State: MI

Postal Code: 49601

Country: US

County: -9999

Section 2. General Facility Information

Full Facility/ Site Name

Cadillac WWTP

Site/Facility Location Address

1121 Plett Road
Cadillac, MI 49601

Facility Location

44.266,-85.3978

Facility Website Address (If applicable)

<http://www.cadillac-mi.net/>

[CLICK HERE](#) to view the Appendix to the permit application

Does the facility have a DEQ-certified operator at the appropriate level?

YES

If you do not have a certified operator, please provide an explanation.

NONE PROVIDED

Section 3. Certified Operator (1)

[CLICK HERE](#) to view the Appendix; Instructions for this item are on page 3

? Use the "+" (repeat section) button above to add more than one certified operator.

If you are not a certified operator and your browser prepopulates your first/last name, you may delete them or hit "Clear Section" to clear all fields

Certified Operator

The individual's name, company, phone, email, and address are required

Prefix: Mr.

First Name: Jeffrey

Last Name: Dietlin

Section 5. Additional Information

1. RULE 98 – ANTIDegradation REQUIREMENTS

In accordance with Rule 323.1098 of the Michigan Water Quality Standards, the applicant is required to submit an Antidegradation Demonstration for any new or increased loading of pollutants to the surface waters of the state, unless one or more exemptions apply. An Antidegradation Demonstration must contain the information specified in Rule 1098, outlined on Pages 8-9 of the Appendix. For assistance in completing this item, contact the Permits Section.

[Appendix to the Permit Application](#)

Will this discharge be an increased loading of pollutants to the surface waters of the state?

No -- Skip ahead to the next 1 sub-section (LUG Info.)

If you responded "YES" above, is the increased loading of pollutants exempt from Antidegradation Demonstration?

Exemptions List:

A) A short-term (weeks to months) or temporary lowering of water quality
B) Bypasses that are not prohibited by regulations set forth in 40 CFR 122.41(m)
C) Response actions undertaken to alleviate a release of pollutants into the environment that may pose an imminent and substantial danger to the public health or welfare
D) Discharges of pollutant quantities from the intake water at a facility if the intake and discharge are to the same body of water
E) Increases in flow at a POTW if the increase is within the design flow of the facility, there is no increased loading of BCCs that are not specifically limited in the current permit, and there is no significant change expected in the characteristics of the wastewater collected
F) Intermittent increased loading related to wet-weather conditions
G) New or increased loading due to DEQ-approved controls related to wet-weather conditions
H) Discharges authorized by Certificates of Coverage (COC) and Notices of Coverage
I) Increased loadings within the authorized levels of a limit in an existing control document, except those loadings that result from actions by the permittee that would otherwise require submittal of an increased use request
J) Increased loadings of a pollutant which do not involve Bioaccumulative Chemicals of Concern and which use less than 10 percent of the unused loading capacity that exists at the time of the request

Select all that apply (See Exemptions List above)

NONE PROVIDED

? To deselect one or more exemptions, you may also hold down the "Ctrl" key on your keyboard while clicking the items you would like to deselect with your mouse.

Comment: NONE PROVIDED

2. INFORMATION CONCERNING LOCAL UNIT OF GOVERNMENT (LUG)

Local Unit of Government (LUG)

City Of Cadillac

Provide an e-mail address for an appropriate LUG contact, such as a clerk, who can be notified about the public notice period:

swasson@Cadillac-MI.net

3. OTHER ENVIRONMENTAL PERMITS

Provide the information requested in the table for any other federal, state, or local environmental permits in effect or applied for at the time of the permit application.

the time of submittal of this Application, including, but not limited to, permits issued under any of the following programs: Air Pollution Control, Hazardous Waste Management, Wetlands Protection, Soil Erosion and Sedimentation Control, and other NPDES permits.

Table Data

NONE PROVIDED

4. WATER FLOW DIAGRAM AND NARRATIVE DESCRIPTION

In the space below, please upload a flow diagram (using 8½" x 11" paper if possible) and a narrative description that explains the diagram. The diagram should show the wastewater flow through the facility (from intake through discharge), including all processes, treatment units, including any lagoons or ponds (lagoon / pond construction and liner information should be included) used for wastewater treatment or storage (identify treatment units that operate intermittently), and bypass piping. Show all operations contributing wastewater and the locations of flow meters, chemical feeds, and monitoring and discharge points. The water balance shall show the daily average flow rates at the intake and discharge points, and approximate daily flow rates between treatment units, including influent and treatment rates. Use actual measurements whenever available, otherwise use the best estimate. Show all significant losses of water to products, atmosphere, and discharge. In addition, provide a flow diagram for any storm water discharges from secondary structures that are required by state or federal law and for storm water runoff from any Site of Environmental Contamination, pursuant to Part 201 of the NREPA. Do not send blueprints. Provide black-and-white reproducible diagrams. Treatment Works Treating Domestic Sewage – The narrative description shall briefly describe the history of the wastewater treatment facility and collection system, including the initial construction, facility improvements, future plans for upgrade, location of all constructed emergency overflows, and other pertinent information.

WATER FLOW DIAGRAM AND NARRATIVE DESCRIPTION- Attachment(s)

Section 7. Facility Information

1. WATER SUPPLY INFORMATION

List the source(s) of the water supply in the area served by sewers. Identify groundwater wells and surface water intakes, as well as the name(s) of any surface water(s) from which intake water is drawn:

8th Street well field Crosby Street well field

Total population served by this facility

11300

2. SERVICE AREA INFORMATION

?PUBLICLY-owned? treatment works (POTWs) are required to provide the following information: List the governmental jurisdictions (e.g., cities, townships, villages) that this facility serves (applicants should include themselves). What is the population in each jurisdiction? Is the jurisdiction's collection system separate, combined, or both? If the collection system is both separate and combined, what percentage is combined?

Table Data

Municipality and Contact E-Mail Address	Type of Collection System	Percent Combined	Population Served
Selma Township	Separate / Combined		410
Cherry Ridge Township	Separate / Combined		410
Clam Lake Township	Separate / Combined		57

?PRIVATELY-owned? treatment facilities are required to provide the following information. Describe the area served by this facility (e.g., manufactured housing community, condominium, nursing home, etc.):

NONE PROVIDED

Provide the number of residential units served by this facility

Comment: NONE PROVIDED

4. WHOLE EFFLUENT TOXICITY TESTING

POTWs meeting one or more of the following criteria are required to submit with this Application the results of four (4) Whole Effluent Toxicity (WET) test sets for each of the facility's discharge points, excluding combined sewer overflows: 1) POTWs with a design flow rate greater than or equal to one (1) million gallons per day (MGD); 2) POTWs with an approved Federal Industrial Pretreatment Program (FIPP); and/or 3) POTWs required to develop a FIPP. The forms required for all WET test reporting are provided in the Appendix. For purposes of this Application, WET test results shall be reported using only the forms provided. Choice of form(s) shall be dictated by the type of testing required. The type of testing required, and the species required for each test set, is described on page 17 of the Appendix. Please do not submit additional forms or paperwork pertaining to WET tests with this Application unless instructed to do so or if a result from a WET test revealed toxicity (see below). At a minimum, the applicant shall submit the results of quarterly WET tests for a 12-month period prior to this Application or the results of annual WET tests conducted during the five years prior to this

tests for a 12-month period prior to this application, or the results of annual WET tests conducted during the five years prior to this Application. In addition, the applicant shall submit the results of any other WET tests from the past five years. If a WET test conducted in the past 4½ years revealed toxicity, provide all the information on the cause of toxicity or the results of all toxicity reduction evaluations, if any were conducted. It is not necessary to submit results for previously submitted WET tests. For additional information, see "Whole Effluent Toxicity Test Guidance and Requirements" on page 17 of the Appendix.

Table Data

NONE PROVIDED

Inflow and Infiltration

What is the current average daily volume of inflow and infiltration at this outfall in GPD?

0

What corrective actions are being taken to minimize this inflow and infiltration?

NONE PROVIDED

2. EFFLUENT CHARACTERISTICS – CONVENTIONAL POLLUTANTS

Existing Treatment Works Treating Domestic Sewage (TWTDS) are required to report data from effluent sampled and analyzed by the permittee for the parameters listed in the excel spreadsheet at the link below titled, 'CONVENTIONAL POLLUTANTS'. Retention Treatment Basins are required to provide a summary of influent and effluent data for the last three years. New TWTDS are required to provide estimated effluent concentrations. For analytical test requirements, or if alternate test procedures for any parameter listed below have been approved, see Item 5 of the General Provisions Section at the beginning of this form. If the data was previously submitted via e-DMRs, mark that box on the spreadsheet. Data previously submitted via e-DMRs does not need to be resubmitted. (See the Definition Section on Page 7 of the Appendix for sampling definitions, including "maximum daily concentration" and "maximum monthly concentration".

[Appendix to the Permit Application](#)

Please Note: Rule 323.1062 allows the use of either Escherichia coli or Fecal Coliform Bacteria as the indicator that effluent has been disinfected. The DEQ will use the indicator selected below in the permit issued based on this Application.

Use Fecal Coliform Bacteria as an indicator of disinfection.

Pollutant Samples

Enter the information into excel

Table Data

NONE PROVIDED

3. EFFLUENT CHARACTERISTICS – TOXIC POLLUTANTS

Existing POTWs with (1) a design flow greater than or equal to 1.0 MGD; or (2) an approved Federal Industrial Pretreatment Program (FIPP); or (3) required to develop a FIPP or otherwise required by the permitting authority, shall provide the results of a minimum of three effluent analyses for each parameter listed on the spreadsheet "TOXIC POLLUTANTS" outfall through which effluent is discharged. Any effluent testing data for pollutants not specifically listed shall be added to the bottom of the form. Do not include information on combined sewer overflows in this section. All existing POTWs (unless already included above) are required to provide (1) the results of at least one effluent analysis (taken in the last three years) for any chemical that is known or believed to be present in facility effluent that is listed in Tables 2, 3, and 4 of the Appendix; (2) a measured or estimated effluent concentration for any chemical that is known or believed to be present that is listed in Table 5 of the Appendix; (3) a measured or estimated concentration for any toxic

that is known or believed to be present that is listed in Table 5 of the Appendix; (3) a measured or estimated concentration for any toxic or otherwise injurious chemical known or believed to be present in facility effluent that is not previously identified in this Application; and (4) results of all other effluent analyses that have been performed within the past five years for any chemical listed in Tables 2, 3, 4, and 5 of the Appendix. New POTWs are required to provide an estimated effluent concentration for any chemical expected to be present in facility effluent that is listed in Tables 2, 3, 4, and 5 of the Appendix, and an estimated effluent concentration for any toxic or otherwise injurious chemical known or believed to be present in facility effluent that has not been previously identified in this Application. Note: If the effluent concentrations are estimated, place an E in the "Analytical Method" column. In accordance with Rule 323.1211(7), facilities whose supply water contains toxic pollutants that are withdrawn from and discharged to the same body of water may qualify for intake credits for those toxic pollutants. See Rule 1211(7) for qualification and demonstration requirements. Report all sampling results in µg/l. Please review Table 7 in the Appendix for additional analytical test requirements. If Alternate Test Procedures were approved for any parameter listed above, a copy of the approval letter must be included with the application.

Kar Lab Biosolids 3-14-2016.pdf

Comment: NONE PROVIDED

POLLUTANTS OF CONCERN. Are there currently, or is there potential for, pollutants (other than the parameters listed in the table above) to be present in the residuals at concentrations that would make them unsuitable for land application?

No. Continue to Additional Biosolids Monitoring Data

ADDITIONAL BIOSOLIDS MONITORING DATA

Submit any biosolids monitoring data from the last permit cycle for parameters not specifically listed on the previous page. Enter the information into the excel template below and include the actual analytical data sheets as an attachment. Upon submittal review, additional monitoring may be required if the Water Resources Division has reason(s) to suspect that the information provided (or not provided) does not adequately characterize the residuals proposed to be land applied. For assistance with completing this item, contact the Permits Section.

Table Data

Parameter	Average Monthly Concentration	Maximum Concentration	Units	Number of Analyses	Sample Type	Analytical Method	Quantification Level
Fecal Coliform	468363	936000	MPN/g dry	2	Grab / Composite	EPA 1680	1 MPN/g dry
Enteric Virus	<1	<1	pfu/4g dry	2	Grab / Composite	EPA 625/R-92/013	1 pfu/4g dry
Solids	2.51	3.3	%	2	Grab / Composite	SM 2540G	0.01%
Salmonella	<3	<3	MPN/4 g dry	2	Grab / Composite	EPA 1682	3 MPN/4 g dry
Helminth Ova	<1	<1	ovum/4 g dry	2	Grab / Composite	EPA/625/R-92/013	1 ovum/4 g dry

LAND APPLICATION SITE LIST

Provide the following information for every new or existing site that may be used in the next five years (biosolids permit cycle). Each listed site should have been submitted to the DEQ on a Site Identification Form (with attachments) since January 1, 1998, or the required information should be included with this form. Additional sites may be added to the Land Application Site List during the biosolids permit cycle by submitting a completed Site Identification Form with the appropriate attachments and waiting the required ten-day notification period.

Table Data

Site Identification Number	Latitude in Decimal Degrees	Longitude in Decimal Degrees	Acres	Owner's Last Name	New Site	CPLR Site

Section 13. Storm Water

STORM WATER DISCHARGES: Storm water is defined herein as storm water runoff, snow melt runoff, and surface runoff and drainage.

A. Is this facility engaged in a regulated "industrial activity" as defined in 40 CFR 122.26(b)(14)? To make this determination, see the DEQ Storm Water website (<http://www.michigan.gov/deqstormwater>, then click on Industrial Program, then click on Primary Activities & Standard Industrial Classification (SIC) Codes.

No. STOP: Do not complete the rest of Section 13. Storm water authorization is not required.

B. Is the storm water from this facility discharged to a surface water of the state either directly or through another conveyance (e.g., municipal separate storm sewer system)? Note: If storm water is discharged to a municipal combined storm sewer system, a municipal wastewater treatment system, or a privately-owned activated sludge treatment system, check the "No" box.

YES. Provide the name(s) of the surface water(s) of the state: Continue to question C.

If you answered YES to the previous question, enter the name(s) of the surface water(s) of the state:

Clam River

C. Are any industrial activities or materials exposed to storm water at this facility?

No. Applicant must complete the No Exposure Certification (NEC) Form in the Appendix and submit it with this Application, then STOP: Do not complete the rest of Section 13.

Use the link below to make a determination regarding exposure of industrial activities or materials to storm water:

[CLICK HERE to see the No Exposure Certification Guidance page](#)

D. Does this facility have an Industrial Storm Water Certified Operator who has supervision over the facility's industrial storm water treatment and control measures?

YES. Provide that person's name and number on the lines provided, then continue to question E:

For more information about certified operator training schedules and training material, [CLICK HERE](#), then scroll down to Industrial Storm Water Certified Operator Training Options

Industrial Storm Water Certified Operator's Name and Certification Number

Jeff Dietlin - 02413

E. Has a Storm Water Pollution Prevention Plan (SWPPP) been developed and implemented for this facility?

Yes. Continue to question F.

For information about Stormwater Pollution Prevention Plans (SWPPP), [CLICK HERE](#), then scroll down to Storm Water Pollution

F.1. READ ALL PARTS OF THE FOLLOWING QUESTION BEFORE RESPONDING: Does this facility discharge storm water to a surface water of the state or a municipal separate storm sewer system from a Special-Use Area?

No. Continue to G.

A) Secondary containment structure(s) required by state or federal law. Attach a list of the materials stored in this area.B) Areas identified on Michigan's list of Sites of Environmental Contamination, pursuant to the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, Part 201 (formerly 307)C) A facility that the DEQ has determined discharges storm water that is a significant contributor of pollutants to surface waters of the state

Check all Special-Use Area(s) that apply. Continue to question F.2.:

NONE PROVIDED

F.2. Has a Short-Term Storm Water Characterization Study (STSWCS) Plan been approved by the DEQ for this facility?

F.3. If you answered yes to the previous question: Have any changes occurred at the facility which could result in the discharge of pollutants that differ from those identified in the previously approved STSWCS Plan?

G. Additional Information- Attachment

NONE PROVIDED

Comment: NONE PROVIDED

Section 14. Other Information

Comments (As needed)

Called MDEQ and was told I didn't need to submit anything that already had been submitted. I think I have all information you need but if something is missing and it wasn't already submitted please contact me.

Additional Documents (As needed)- Attachment
