CONFIDENTIAL INFORMATION
RE: Composition of FOAM RID 30

Dear Mr. Shay:

Regarding the composition of FOAM RID 30 antifoam product which Broadmoor Products, Inc. distributes to AAR Mobility Systems, the FOAM RID 30 product is manufactured by our sister company, Algoma Products, Inc., also located at this address.

The CONFIDENTIAL product composition of the FOAM RID 30 product is as follows:

30 - 50% "antifoam concentrate" (a proprietary raw material blend)
50 - 70% Softened Water

We hereby certify that no other ingredients are used in the formulation of FOAM RID 30.

To the best of our knowledge from the Safety Data Sheet of the "antifoam concentrate" provided by our supplier, there are no perfluoroalkyl or polyfluoroalkyl substances present in that raw material and therefore none in FOAM RID 30.

Please note that we received a similar request for disclosure of the composition of FOAM RID 30 from a beverage customer of ours that wished to use the product and discharge it to the City of Grand Rapids Water Resource Recovery Facility. In that case we sent a certification letter similar to this one to the director of Grand Rapids' Industrial Pretreatment Program, and also had our supplier of the of the "antifoam concentrate" raw material independently communicate their proprietary composition information to him. Since we did receive permission to sell the FOAM RID 30 to the customer in Grand Rapids, we assume that it passed muster with the City of Grand Rapids Water Resource Recovery Facility and that its composition is free of perfluoroalkyl and polyfluoroalkyl substances.

We request that you consider the composition information provided for Foam Rid 30 to be confidential information.

Please let us know if we can be of any further assistance or if further information is required.

Sincerely,

A handwritten signature in blue ink that reads "David A. Van Dyke". The signature is written in a cursive style with a large, stylized 'D' and 'V'.

David Van Dyke, Ph.D.
Technical Director, Broadmoor Products, Inc.
