Regarding Polyfluorinated Substances (including Polyfluorinated Alkyl Compounds) in Products Distributed by Broadmoor Products, Inc.:

Broadmoor Products, Inc. certifies that, to the best of our knowledge, none of the raw materials in the following proprietary cleaning products incorporate any polyfluorinated compounds:

ADDITIVE 595
BASIC BLUE SF

These products are manufactured by our sister company Algoma Products, Inc., which is located at the same address. No polyfluorinated substances are listed as ingredients on any of our raw material Safety Data Sheets for these products. In particular, all surfactants present in the formulations are conventional, non-fluorinated surfactants, and the compositions of all raw materials in these proprietary products are fully disclosed information to us from our suppliers.

Furthermore, although not applicable to the above product(s), we have confirmed with our suppliers of proprietary-composition defoamers, surfactants, and metal finishing raw materials that none contain polyfluorinated compounds.

Let me know if you require any further information or have any further questions.

Sincerely,

David Van Dyke, Ph.D.
Technical Director, Broadmoor Products, Inc.
