Antidegradation

RULE 98 ♦ ANTIDEGRADATION REQUIREMENTS

In accordance with R 323.1098 of the Michigan Water Quality Standards, the applicant is required to submit an Antidegradation Demonstration for any new or increased loading of pollutants to the surface waters of the state, unless one or more exemptions apply. An Antidegradation Demonstration must contain the information specified in Rule 1098, outlined in the Appendix.

[Appendix to the Permit Application](#)

This part of the application enables the Department to determine whether you are seeking authorization for a change to your current NPDES permit that represents a new or increased loading of pollutants to the surface waters of the state. Select any/all that apply or select "None."

E) None: I am not seeking any such changes to my current permit

Additional Information

Other Environmental Permits

Provide the information requested in the table for any other federal, state, or local environmental permits in effect or applied for at the time of submittal of this Application, including, but not limited to, permits issued under any of the following programs: Air Pollution Control, Hazardous Waste Management, Wetlands Protection, Soil Erosion and Sedimentation Control, and other NPDES permits. If none, please enter NA.

Other Environmental Permits (Click 'Add Row' for each environmental permit)

Issuing Agency:	Permit or COC Number:	Permit type:
EGLE	MI0020257	NPDES

♦ Surface waters of the state ♦ means all the following: The Great Lakes and their connecting waters, all inland lakes, rivers, streams, impoundments, open drains, wetlands, and other surface bodies of water within the confines of the state but does not include drainage ways and ponds used solely for wastewater conveyance, treatment, or control. A storm sewer is not a surface water of the state.

Water Source and Discharge Type**↻ 1. WATER SUPPLY INFORMATION**

List the source(s) of the water supply in the area served by sewers. Identify groundwater wells and surface water intakes, as well as the name(s) of any surface water(s) from which intake water is drawn:

City of Cadillac Water Dept. Ground Water Wells

506 8th St.

5360 S Crosby Rd.

Cadillac, MI 49601

What is the total population served by this facility?

11377

↻ 2. SERVICE AREA INFORMATION

Is this facility Publicly or Privately owned?

PUBLIC

List the governmental jurisdictions (e.g., cities, townships, villages) that this facility serves (applicants should include themselves). What is the population in each jurisdiction?

Municipality	Contact Email Address	Type of Collection System	Percent Combined	Population Served
Selma TWP	shill@wadetrim.com	Separate	0	410
Cherry Groove TWP	shill@wadetrim.com	Separate	0	410
Clam Lake TWP	shill@wadetrim.com	Separate	0	57
City of Cadillac	Jdietlin@cadillac-mi.net	Separate	0	10500

CORRECTION REQUEST (CORRECTED)

Service Area

Please clarify why the service area population does not match the total population served.

Created on 6/7/2022 9:32 AM by **Tom Braum**

1 COMMENT

Jeffrey Dietlin Cadillac Financing Auth. GWCU (utilities@cadillac-mi.net) (9/20/2022 4:17 PM)

Forgot to add the City and forgot to add townships to the total. Thought you were asking for the City Population and then the townships we serve seperately.

3. WASTEWATER STABILIZATION LAGOONS

Does this facility have a wastewater stabilization lagoon?

NO

4. WHOLE EFFLUENT TOXICITY TESTING

Does the facility have a design flow rate greater than or equal to one (1) MGD?

YES

WET Test Guidance

At a minimum, the applicant shall submit the results of quarterly WET tests for a 12-month period prior to this Application, or the results of annual WET tests conducted during the five years prior to this Application. In addition, the applicant shall submit the results of any other WET tests from the past five years. If a WET test conducted in the past 4 years revealed toxicity, provide all the information on the cause of toxicity or the results of all toxicity reduction evaluations if any were conducted. It is not necessary to submit results for previously submitted WET tests. Please do not submit additional forms or paperwork pertaining to WET tests with this Application unless instructed to do so or if a result from a WET test revealed toxicity. For additional information, see [Whole Effluent Toxicity Test Guidance and Requirements](#) in the Appendix. Attach copies of WET test analytical laboratory reports below.

[Appendix to the Permit Application](#)

Outfall Information and Effluent Characteristics (1 of 1)

Outfall:001 Receiving water:Clam River

Existing outfalls can be selected in the top-right corner of the page.

?To add additional outfalls (new or existing), please use the **Add New** button at the bottom of this page, or select **Duplicate** to copy the outfall information and edit a portion of the fields on the page.

1. OUTFALL INFORMATION

Enter the outfall number (e.g., 001):

001

Outfall Description

NONE PROVIDED

Enter the name of the receiving water:

Clam River

Outfall

44.2656826475707,-85.39836981481933

?DEFINITIONS: A facility is considered to have a SEASONAL discharge if wastewater is treated AND STORED throughout a portion of the year and then discharged over a specified period or periods of days, weeks, or months. Batch process discharges are not seasonal discharges. Any facility that does not discharge seasonally is considered to have a CONTINUOUS discharge. Batch discharges are a type of continuous discharge.

[CLICK HERE to view the application Appendix](#)

Is the discharge continuous or seasonal?

Continuous

2. FLOW

What is the annual average design flow rate for this facility, in MGD?

3.2

How often is there a discharge from this outfall (on average)?

Hours per day:	Days per year:
24	365

Years Ago:	Actual Annual Average Daily Flow (MGD):	Actual Maximum Daily Flow in a Single Day (MGD):
3 Years Ago	1.78	2.96
2 Years Ago	1.62	2.34
Last Year	1.71	2.85

Does this outfall have batch discharges?

NO

3. INFLOW AND INFILTRATION

What is the current average daily flow rate of inflow and infiltration at this outfall in GPD?

0

What corrective actions are being taken to minimize this inflow and infiltration?

None

4. EFFLUENT CHARACTERISTICS - CONVENTIONAL POLLUTANTS

Existing Treatment Works Treating Domestic Sewage (TWTDS) are required to report data from effluent sampled and analyzed by the permittee for the parameters listed in the table below. Retention Treatment Basins are required to provide a summary of influent and effluent data for the last three years. If the data was previously submitted via Discharge Monitoring Reports (DMRs), indicate this in the table below. Data previously submitted via DMRs does not need to be resubmitted.

FOR ALL APPLICANTS, SAMPLE RESULTS ARE REQUIRED FOR: Biochemical Oxygen Demand five day (BOD5), Chemical Oxygen Demand (COD), Total Organic Carbon (TOC), Ammonia Nitrogen (as N), Total Suspended Solids, Temperature-Summer, and Temperature-Winter, UNLESS you request a waiver and provide sufficient rationale to support that request.

Please fill out the table below, indicating how you have, or will be, providing the required analytical results. In the "How are results provided?" column, select "DMR" if you submit Discharge Monitoring Reports (DMRs) for that parameter, select "LAB REPORT" if you have attached a lab report for that parameter, or select "NONE" if you do not submit DMRs and have not attached a lab report for that parameter.

[CLICK HERE to open the Appendix to the Permit Application](#)

Please confirm that you have read the statements above.

I Confirm

Effluent Characteristics - Conventional Pollutants

Conventional Pollutants	How are Results Provided?	Waiver Information	Provide Rationale Here to Support Waiver Request
Biochemical Oxygen Demand - five day (BOD5)	DMR		
Chemical Oxygen Demand (COD)	NONE	I request a waiver for this parameter based on the following rationale:	The facility reports data for CBOD5 which is more representative of the discharge than COD
Total Organic Carbon (TOC)	NONE	I request a waiver for this parameter based on the following rationale:	The facility reports data for CBOD5 which is more representative of the discharge than TOC A study concludes that TOC can be reliably used for the generic replacement of COD and BOD5 in influent wastewaters but only for COD in final effluents. Since we believe CBOD5 is more representative I do not believe this is needed.
Ammonia Nitrogen (as N)	DMR		
Total Suspended Solids	DMR		
Temperature, Summer	NONE	I request a waiver for this parameter based on the following rationale:	Treatment process will not result in the temperature of discharge varying from ambient temperatures.
Temperature, Winter	NONE	I request a waiver for this parameter based on the following rationale:	Treatment process will not result in the temperature of discharge varying from ambient temperatures.
pH	DMR		
Total Dissolved Solids	NONE	Waiver request not required.	
Total Phosphorus (as P)	DMR		
Fecal Coliform Bacteria	DMR		
Escherichia coli	NONE	Waiver request not required.	
Total Residual Chlorine	NONE	Waiver request not required.	
Dissolved Oxygen	DMR		
Oil & Grease	NONE	Waiver request not required.	

CORRECTION REQUEST (CORRECTED)

Conventional Pollutants

The waiver rationales for COD, TOC, and Temperature are inadequate. Please revise these waiver requests. An example of an adequate waiver request could be, "The facility reports data for CBOD5 which is more representative of the discharge than COD" or "Treatment process will not result in the temperature of discharge varying from ambient temperatures."

Created on 6/7/2022 9:32 AM by **Tom Braum**

Please attach laboratory reports for conventional pollutants here.

NONE PROVIDED

Comment

NONE PROVIDED

***Please note: This form may have a glitch. When you click  Add New,  it may cause the Conventional Pollutant table to not be changeable. To fix it, click into another Section, such as Additional Information, and then click back into this Section (Outfall Information and Effluent Characteristics), click into the Outfall you were adding/editing, and the table will work as intended. ***

 5. DISINFECTION INDICATOR

Which of the following does the facility use as an indicator that the effluent has been disinfected? In accordance with R 323.1062, EGLE will use the indicator selected below within the permit that will be issued based on this application.

Fecal Coliform Bacteria is used as an indicator of disinfection

 6. EFFLUENT CHARACTERISTICS - TOXIC POLLUTANTS

Tables referenced below are located in the Appendix.

Existing POTWs that 1) have a design flow greater than or equal to 1.0 MGD, 2) have an approved Federal Industrial Pretreatment Program (FIPP), 3) are required to develop a FIPP, or 4) are otherwise required by the Department, shall submit the results of a minimum of three effluent analyses for each parameter identified in the Additional Monitoring Requirements section of their NPDES permit for each outfall. Any effluent testing data obtained by the facility for pollutants not specifically identified in the Additional Monitoring Requirements section of their NPDES permit shall also be submitted with this Application. Do not include information on combined sewer overflows in this section.

Existing POTWs that do not meet one or more of the criteria above shall submit 1) the results of at least one effluent analysis (taken within the past three years) for any chemical listed in Tables 2, 3, and 4 of the Appendix that is known or believed to be present in the effluent; 2) a measured or estimated effluent concentration for any chemical listed in Table 5 of the Appendix that is known or believed to be present in the effluent; 3) a measured or estimated concentration for any toxic or otherwise injurious chemical not previously identified in this Application that is known or believed to be present in the effluent; and 4) the results of all other effluent analyses that have been performed within the past five years for any chemical listed in Tables 2, 3, 4, and 5 of the Appendix.

Review Table 7 of the Appendix for additional requirements relevant to this section.

Copies of analytical laboratory reports shall be attached below, unless those results have been previously supplied to the Department or submitted via DMRs.

[CLICK HERE to open the Appendix to the Permit Application](#)

Does the facility have industrial users or indication that any chemical listed in Tables 2, 3, 4, or 5 of the Appendix, or any other pollutant, is known or believed to be present in the effluent?

YES

Does the facility have effluent results for any parameter not previously submitted via the DMRs?

YES

On what date(s) were those tests completed?

Monthly

Have those results been previously submitted to EGLE?

YES

CORRECTION REQUEST (CORRECTED)**October 2019 Additional Monitoring Requirements Lab Report**

We request the permittee contact Paragon Labs to ask if the October 2019 lab report can be revised to include results for 2-chlorophenol (CAS# 95578) and Bis(2-chloroisopropyl)ether (CAS# 108601) and if so, resend the lab report or, The facility shall collect one final effluent sample in June 2022 and have the sample analyzed for 2-chlorophenol (CAS# 95578) and Bis(2-chloroisopropyl)ether (CAS# 108601). The October 2019 Additional Monitoring Requirements lab report did not include any results for 2-chlorophenol (CAS# 95578) and Bis(2-chloroisopropyl)ether (CAS# 108601).

Created on 6/7/2022 9:31 AM by **Tom Braum**

1 COMMENT

Jeffrey Dietlin Cadillac Financing Auth. GWCU (utilities@cadillac-mi.net) (9/20/2022 4:42 PM)

We sent wrong file initially. We had already asked them for those and they sent us a revised final report.

Please attach analytical laboratory reports for toxic pollutants here.

Collection System Information

Is any portion of the collection system combined?

NO

Nondomestic Wastewater Information

◆ **SEPTAGE** ◆ **Does this facility accept septage?**

NO

◆ **RESOURCE CONSERVATION AND RECOVERY ACT (RCRA) WASTEWATER.** Does this facility receive, or has it in the last three (3) years received, RCRA hazardous waste by truck, rail, or dedicated pipe?

NO

◆ **REMEDIATION WASTEWATER.** Does this facility receive, or has it been notified that it will receive in the next five (5) years, wastes from remediation activities?

NO

◆ INDUSTRIAL AND COMMERCIAL SOURCES

Does this facility receive any nondomestic wastewater from any industrial or commercial facilities? (Nondomestic wastewater refers to water that carries wastes other than human and household wastes).

YES

Estimate the total average daily flow rate of nondomestic wastewater received by this facility, in MGD.

.64

Type and Average Daily Flow Rate of Nondomestic Wastewater(s)

In the table below, enter the average daily flow rate (in MGD) of all nondomestic wastewater(s) that will be received by this facility.

Wastewater Type	Average Daily Flow Rate (MGD)
Industrial Process Wastewater	.213
Contact Cooling Water	.213
Noncontact Cooling Water	.213
Landfill Leachate	0
Trucked Industrial Wastewater	0

Wastewater Type	Average Daily Flow Rate (MGD)
Other	0.00015

If "Other" nondomestic wastewater type was selected above, please describe:

Car lot wash water

Is an Industrial Pretreatment Program (IPP) currently required by EGLE?

YES

Please select the date on which the City Council incorporated each of the following: Sewer Use Ordinance, Interjurisdictional Agreements, Procedures, Other Legal Authority, and Enforcement Response Plan.

The date-picker will only display 20-year spans at a time, but you may type the full date directly or use the right/left arrows within the date-picker. If no date applies, please enter 01/01/1900.

Description:	Date:
Sewer Use Ordinance Date	05/15/2000
Interjurisdictional Agreements Date	9/19/2017
Procedures Date	4/6/2009
Other Legal Authority Date	4/6/2009
Enforcement Response Plan Date	4/6/2009

Storm Water

Is the annual average design flow rate of the facility 1.0 MGD or greater?

YES

"Surface waters of the state" means all of the following: The Great Lakes and their connecting waters, all inland lakes, rivers, streams, impoundments, open drains, wetlands, and other surface bodies of water within the confines of the state but does not include drainage ways and ponds used solely for wastewater conveyance, treatment, or control.

Please confirm that you have read the definition of "Surface Waters of the State" above

I Confirm

Is the storm water from this facility discharged to a surface water of the state, either directly or through another conveyance such as a municipal separate storm sewer system? NOTE: If storm water is discharged to a municipal combined storm sewer system, a municipal wastewater treatment system, or a privately-owned activated sludge treatment system, select "NO."

YES

Use the link to determine if the site is eligible for Storm Water No Exposure Certification

[CLICK HERE to see the No Exposure Certification Guidance page](#)

Are any industrial activities or materials exposed to storm water at this facility?

NO. The applicant must complete the No Exposure Certification (NEC) application in MiWaters.

Agreements and Signature(s)

SUBMISSION AGREEMENTS

- ☒ I am the owner of the account used to perform the electronic submission and signature.
- ☒ I have the authority to submit the data on behalf of the facility I am representing.
- ☒ I agree that providing the account credentials to sign the submission document constitutes an electronic signature equivalent to my written signature.
- ☒ I have reviewed the electronic form being submitted in its entirety, and agree to the validity and accuracy of the information contained within it to the best of my knowledge.

APPLICATION CERTIFICATION

*Rule 323.2114(1-4), promulgated under the Michigan Act, requires that **this Application must be signed as follows:***

A. For an organization, company, corporation, or authority, by a principal executive office, vice president, or higher

B. For a partnership, by a general partner

C. For a sole proprietor, by the proprietor

D. For a municipal, state, or other public facility, by a principal executive officer or ranking elected official (e.g., mayor, village president, city or village manager, or clerk)

Note: *If the signatory is not listed above, but is authorized to sign the Application, please provide documentation of that authorization.*

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for having knowledge of violations."

I understand that my signature constitutes a legal agreement to comply with the requirements of the NPDES Permit. I certify under penalty of law that I possess full authority on behalf of the legal owner/permittee to sign and submit this Application.
