Hi Jeff,

DEQ permit staff will hopefully have a draft renewed NPDES permit for you and Doug to review soon. I was told by permit staff that the draft permit(s) will include some additional seasons (relative to the discharge limits) that will hopefully be more representative of the spring/fall weather.

Also, the new permit will continue to include some verbiage on asset management. Since the City has provided minimal information on asset management to date (asset management reports submitted in MiWaters are attached), much of the asset management verbiage in the current permit may be carried over in the renewed permit.

Could we meet to discuss asset management sometime? I can check off certain boxes if I just review the information the City has on file (vs. requiring the City to submit the information). I know the City took/is taking the initiative to implement asset management, I just need to document how I know this, specifically with the items that are listed in the NPDES permit. Do you have any availability the week of 10/22?
