

August 21, 2007

Mr. Jack Patel
CTI and Associates, Incorporated
12482 Emerson Drive
Brighton, Michigan 48116

Dear Mr. Patel:

SUBJECT: Wexford County Landfill Effluent Limits Only Request
Designated Name: Wexford Co LF

This letter is written in response to Ms. Beth Benoit's request received March 27, 2007, for effluent limitations for the Wexford County Landfill, located in Manton, Michigan, for the discharge of 100,000 gallons per day of treated landfill leachate to an unnamed tributary to Manton Creek via drainage ditches. The 95 percent exceedance flows for the unnamed tributary and Manton Creek are 0 and 2.1 cubic feet per second (cfs), respectively. I have attached the preliminary effluent limitations for your information. Please note that there are other acceptable combinations of CBOD₅ and ammonia nitrogen limits.

Please be advised that the attached preliminary effluent limitations are based on the limited information that is currently available and that these limits are not necessarily those that would be included in a permit issued for your proposed facility. If you should apply for a National Pollutant Discharge Elimination System (NPDES) permit, Water Bureau staff will obtain additional information, including the complete application and public comments on the proposed permit, which may change these preliminary limitations. You will also need to submit an Antidegradation Demonstration as part of your application.

Issuance of an individual NPDES permit or certificate of coverage does not authorize the violation of any federal, state, or local laws or regulations, nor does it obviate the necessity of obtaining such permits, including any other Department of Environmental Quality (DEQ) permits, or approvals from other units of government as may be required by law.

Feel free to contact me at the number below if you have any questions.

Sincerely,

Alvin Lam
