

APPLICATION COMPLIANCE COMMENTS MEMO – NPDES

Name: Donal Brady, Cadillac District Office
Date: April 18, 2023
Facility: Cadillac WWTP
Permit No. MI0020257

Primary Compliance Staff: Questions for / instructions to you appear below in blue.

When completing this memo, please ensure that everyone (i.e., ISW, Part 41, IPP, PFAS, and Biosolids staff) who should review the permit application has been individually tasked in MiWaters to review it, has reviewed it by your task deadline, and that all responses made in this memo reflect input/comments from those staff. These tasks exist in MiWaters under the following names:

- ISW Application Review
- Part 41 Application Review
- IPP Application Review
- PFAS Application Review
- Biosolids Application Review

Permit Writer: Responses to you from compliance staff appear below in black.

1. – 2. Primary Compliance			
1. What is the compliance status of the facility with respect to this permit? The facility's record with meeting effluent limits is generally good. The facility experiences problems with plant biology if the weather in the spring or fall is unusual. The facility also experiences problems related to industrial wastewater, industry shutdowns, and the corresponding affects on plant biology. The plant typically experience problems with CBOD, TSS, ammonia, or fecal coliform during a few time periods each year. The facility's IPP needs significant work. VNs were sent in 2020 and 2021 regarding IPP compliance. The facility was issued a NEC for stormwater. Other than IPP submittals, the permittee has generally complied with schedules of compliance. In your response, address effluent limit compliance, IPP compliance, industrial storm water compliance, SOC compliance, etc. If the EERT has determined that the facility should be put on "enforcement hold," indicate this in the database, and explain (in the database) the facility's noncompliance, our planned actions to bring the facility into compliance, and a corresponding timetable.			
2.		Yes	No NA
a.	Are there any apparent inaccuracies or issues with the permit application?	☐	☒
	If yes: Please describe:		
b.	Does the database reflect all submittals received/SOCs met?	☒	☐
	If no: Please explain:		
c.	For POTWs: Have MORs been approved?	☒	☐
d.	For Industrial/Commercial facilities: Are you working with the facility on any concerns related to leaking or unlined treatment ponds/lagoons?	☐	☒
	If yes, what actions are you taking with the facility to address those concerns?		
	Describe any recommendations to Permits Section:		
e.	For Municipal WWSL facilities AND any other Municipal treatment facilities with treatment ponds/lagoons: Is there any known or suspected leakage or groundwater impact from the treatment ponds/lagoons?	☐	☒
	If yes: Access and complete the Lagoon Exfiltration/Leakage Worksheet in MiWaters.		

f.	Are there any operational problems at the facility that Permits Section should be aware of?	☐	☒
	If yes : Please describe:		
g.	Since the issuance date of the current permit, has the District granted a Monitoring Frequency Reduction for any parameter?	☐	☒
	If yes : Please list these parameters and their approved monitoring frequencies:		
h.	Has the District approved remote monitoring for outfall observation and/or equipment inspection?	☐	☒
	If yes : What is the minimum frequency required for on-site visual inspections?		
i.	Any other relevant comments or suggestions?	☐	☒
	If yes , please describe:		
3. Industrial Storm Water			
Please task WRD Regional ISW staff (industrial/commercial facilities only)		Yes	No NA
a.	Are there any apparent inaccuracies or issues with the industrial storm water information provided by the applicant, including the water flow diagram and responses to ISW-related questions?	☐	☐ ☒
	If yes , please explain:		
b.	Was a No Exposure Certification (NEC) Form submitted? If yes , continue to 1) below.	☐	☐
	1) Is NEC coverage appropriate for this facility? If no , continue to 2) below.	☐	☐
	2) Please explain why NEC coverage is not appropriate for this facility:		
c.	Any other relevant comments or suggestions?	☐	☐
	If yes , please describe:		
4. Part 41 Engineering			
Please task WRD Regional Part 41 staff (WWTPs only)		Yes	No NA
a.	Is the design flow identified in the application accurate?	☒	☐ ☐
	If no , please explain:		
b.	Are there any schedules that you recommend be included in the permit (e.g., I/I, construction of plant upgrades, etc.)?	☒	☐ ☐
	If yes , please explain: Please maintain the asset management requirements in the permit		
c.	Are any upgrades/changes planned to take place at the plant within the next 5 years?	☐	☒ ☐
	If yes , please explain:		
d.	Any other relevant comments or suggestions?	☒	☐
	If yes , please describe: We will be working with the WWTP to identify alternatives to cosettling		
5. IPP			
Please task WRD Regional IPP staff		Yes	No NA
	For POTWs only: Any IPP comments?	☒	☐
	If yes , please describe: There have been significant compliance problems with the IPP for this POTW which have resulted in multiple VNs and an SVN issued to the City. The IPP Program is currently being revised, including a headworks loading study and potential revisions to the local limits. Based on review of the biologists memo it appears that multiple parameters are recommended to be added to the new permit which may not have been previously considered as pollutants of concern under local limits		

reviews. It is recommended that the permit include language requiring a technical evaluation of whether local limits are required for the additional pollutants with effluent limits or any revised limits.	
6. PFAS	
Please task WRD Regional PFAS staff	Yes No NA
a. Any PFAS comments? If yes , please describe: Cadillac is classified as a Bin 1 facility. The permit should include additional monitoring requirements for PFOS/PFOA/PFBs; the PMP trigger language; and requirement to report PFAS results via POTW PFAS Effluent Monitoring form.	☒ ☐
b. Has an ACO been issued for regulation of PFAS discharges? If yes , please describe:	☐ ☒
c. For POTWs: Is the POTW currently required to submit reports under the IPP PFAS initiative? If no , please explain: Requirements of the IPP PFAS Initiative have been completed and no further action is required at this time.	☐ ☒
7. Biosolids	
Please task WRD Regional Biosolids staff	Yes No NA
Any biosolids comments? If yes , please describe: Most recent annual report showed table 3 exceedances for Cu and Zn	☒ ☐
8. Other	
Any comments unrelated to the topics addressed above? If yes , please describe:	☐ ☒

NA = Not applicable to this facility.
